General Notes FY 2013

Minnesota

URS Table Number	General Notes
All	Tables labeled 2012 are developed using calendar year 2012 data. Tables labeled 2013 are developed using State Fiscal Year 2013 data. (July 1, 2012 through June 30, 2013)
2a, 2b, 3, 5a, 5b, 6, 14a, 14b, 15a, & 16	As part of a new federal client level reporting requirements, Minnesota has focused its mental health data reporting on client and program outcomes with a special focus on recovery for clients receiving more intensive mental health services. As part of this focus, Minnesota has discontinued Community Mental Health Reporting System (CMHRS) reporting requirements for service provided after 12/31/2011 and discontinued Program Outcome Status Reporting system (POSR) reporting requirements for services provided after 06/30/2012. The new Mental Health Information System (MHIS) was piloted on 07/01/2012, and then implemented on 01/01/2013, for Adult Rehabilitative Mental Health Services, Assertive Community Treatment, Intensive Community Recovery Services, Dialectical Behavior Therapy, Intensive Residential Treatment Services, and State Operated Services providers. Effective 07/01/2013, Housing with Supportive services and Crisis services providers began reporting. In 2008 to 2011, Minnesota combined the population served to include CMHRS and the Medicaid Management Information System.
4, 15, & 16	Effective 7/1/2012 Minnesota piloted MHIS and discontinued the Program Outcome Status Reporting system for adults receiving Assertive Community Treatment, Adult Rehabilitative Mental Health Services, Dialectical Behavior Therapy. Numbers have decreased due to the change in reporting systems.
6	Minnesota continues to focus on developing home and community services in lieu of institutional placements resulting in fewer patients.
9, 11, 11a, & 19a	In 2013, the Adult population from which the sample was drawn are those persons who receive Assertive Community Treatment, Adult Rehabilitative Mental Health Services, or Day Treatment service during calendar year 2012.
9, 11, 11a, 19a, & 19b	In 2013, the Children population from which the sample was drawn are SED children who receive outpatient services with mental health or case management category of service.
11 & 11a	Minnesota developed its own Adult and Family survey, based on MHSIP
12	Minnesota is not able to report the percentage of adults and percentage of children/adolescents served by the SMHA who also have a diagnosis of substance abuse problem, because clients could receive substance abuse treatment by another payor and only one diagnosis is required when Medicaid services are claimed. See percentage of adults meeting Federal definition of SMI who also have a diagnosis of substance abuse problem and Percentage of children/adolescents meeting the Federal definition of SED who also have a diagnosis of substance abuse problem for SMI and SED counts.
12	In 2012, Minnesota discontinued the Community Mental Health Reporting System (CMHRS) reporting requirement. It is the only population from Medicaid Management Information System (MMIS). With the addition of the MMIS claims data, a methodology was developed to determine whether the recipient was likely to have a serious mental illness (SMI) or a severe emotional disorder (SED). The method for children with SED was further refined this year.
15	Data for living situation was reported for adults receiving Assertive Community Treatment, Adult Rehabilitative Mental Health Services or Dialectical Behavior Therapy in Program Outcome Status Reporting system. Effective 7/1/2012 was Program Outcome Status Reporting system was discontinued. Numbers have decreased due to the change in reporting systems.
16	Minnesota is unable to report Children's EBP service because: Minnesota does not provide this tool-kit EBP. Minnesota is in the third year of transforming its children's mental health system through development of the Hawaii Model of evidence-based practices.
17	Minnesota is unable to report Children's EBP service because: Minnesota does not provide this tool-kit EBP. Minnesota is in the third year of transforming its children's mental health system through development of the Hawaii Model of evidence-based practices.
17	Integrated Treatment for Co-occurring services unable to report due to grant ending, plan to implement new data collection methods.
17	Minnesota is unable to report Illness Self-Management service because: Minnesota does not monitor this service for EBP, also there is not a separate cpt code for Illness Self-Management it is bundled with EBP ACT and ARMHS service.

URS Table Number	General Notes
17	Minnesota has chosen not to report on Medication Management services because: Minnesota does not track Medication Management EBP as defined in Table 17 through a Toolkit. Medication Management is a covered service, but the EBP version is not tracked.
19a & 19ba	Minnesota developed its own Adult and Family survey, based on MHSIP.
