URS Table Number	General Notes
14A	<p>NAC 433.040 “Adult with a serious mental illness” and “child with a serious emotional disturbance” defined for counting purposes. (NRS 433.324) Each division facility shall use the following definitions to count the number of persons in this state who are adults with a serious mental illness or children with a serious emotional disturbance: 1. “Adult with a serious mental illness” means a person who is at least 18 years old and has been diagnosed within the immediately preceding 12 months as having a mental, behavioral or emotional disorder as defined in the “Diagnostic and Statistical Manual of Mental Disorders,” as adopted by reference in NAC 433.050, other than an addictive disorder, mental retardation, irreversible dementia or a disorder caused by an abuse of alcohol or drugs, which interferes with or limits one or more major life activities of the adult. 2. “Child with a serious emotional disturbance” means a person who is less than 18 years old and has been diagnosed within the immediately preceding 12 months as having a mental, behavioral or emotional disorder as defined in the “Diagnostic and Statistical Manual of Mental Disorders,” as adopted by reference in NAC 433.050, other than a mental disorder designated as a Code V disorder in the Manual, a developmental disorder or a disorder caused by an abuse of alcohol or drugs, which substantially interferes with or limits the child from developing social, behavioral, cognitive, communicative or adaptive skills or his activities relating to family, school or community. The term does not include a child with a disorder which is temporary or is an expected response to stressful events. (Added to NAC by Common on Men. Health & Men. Retardation, eff. 8-24-88; A 11-19-90; R128-97, 11-14-97)</p>
14A	<p>NRS 433B.045 “Child with an emotional disturbance” defined: “Child with an emotional disturbance” means a child whose progressive development of personality is interfered with or arrested by mental disorder so that he shows impairment in the capacity expected of him for his age and endowment for: 1. A reasonably accurate perception of the world around him; 2. Control of his impulses; 3. Satisfying and satisfactory relationships with others; 4. Learning; or 5. Any combination of these factors. (Added to NRS by 1993, 2708)— (Substituted in revision for NRS 433B.080)</p>
14A	<p>402.36 Severe Emotional Disturbance (SED): 1. Persons from birth through 48 months who currently or at any time during the past year (continuous 12-month period) have a: a). DC:0-3 Axis I diagnostic category in place of a DSM Axis I diagnostic category; or b). DC:0-3 Axis II PIR-GAS score of 40 or less (the label for a PIR-GAS score of 40 is “Disturbed”); or 2. Persons from 4 to age 18 who currently or at any time during the past year (continuous 12-month period) have a: a). Diagnosable mental or behavioral disorder or diagnostic criteria that meets the coding and definition criteria specified in the DSM (excluding substance abuse or addictive disorders, irreversible dementias, mental retardation, developmental disorders, and V codes, unless they co-occur with a serious mental disorder that meets DSM criteria); and have a: b). Functional impairment which substantially interferes with or limits the child from achieving or maintaining one or more developmentally appropriate social, behavioral, cognitive, communicative or adaptive skill. Functional impairments of episodic, recurrent, and persistent features are included, however may vary in term of severity and disabling effects unless they are temporary and an expected response to stressful events in the environment. Children who would have met functional impairment criteria during the referenced year without the benefit of treatment or other support services are included in this definition.3. SED determinations are made by a Qualified Mental Health Professional (QMHP) within the scope of their practice under state law and expertise.</p>
