Federation of Families	PO Box 3061, Bismarck, ND 58502	Statewide	\$0	\$60,514

North Dakota

URS Table Number	General Notes
2a/2b	Data continues to be pulled from 3 different independent sources (community mental health database, state hospital data system, and the children services database). Each independent system collects client demographic information so unduplicated counts can be achieved. The methodology for unduplicated counts is near completion. The ND Department of Human Services continues to work on the development of an overview system to assign a unique client identifier to an individual receiving service which will cross all independent data systems. This will enable more accurate data collection and reporting, with the goal of unduplicated counts.
4	A "fix" to the electronic health record was added in 2010 to update employment status on an annual basis. All records should have been updated. This change affects the employment numbers from SFY 2009 forward.
6	Residential Treatment Centers - Unable to report discharges during the year, LOS of discharged patients, Average LOS for residents at the end of the year for clients in facility for 1 year or less, and Average LOS for residents at the end of the year for clients in facility for more than 1 year. Data retrieval from the children services database is under revision.
11	The percent change from 2011 to 2012 for adults reporting positively about outcomes appears to be correct. However the percent reported in 2013 will be compared to what was reported previously, as 2012 data may have been an anomaly.
12	The methodology used, which begin in SFY 2009 was based on the changes in methodology for calculating Tables 14a and 14b, remains consistent for this reporting period.
14a/14b	The methodology remains consistent with the use of data from the electronic checklists within the community mental health database to assist case managers with identification of individuals diagnosed with serious mental illness and individuals diagnosed with a severe emotional disturbance. This methodology was implemented in SFY 2009.
16	PATH-PATH, Inc. of North Dakota. Data from Therapeutic Foster Care is collected separately from the community mental health data, from which the Children with SED numbers are derived. There is ongoing work to combine the data from the separate data systems. The Therapeutic Foster Care youth demographics cannot be reported, creating the discrepancy between the number of "not available" youth and the number of "not available youth with SED receiving services." With data being collected from separate, independent data systems there continues to be error in reporting. Per NRI's suggestion to attempt to minimize some of the error across the table, all youth with SED receiving services have been coded as "not available." The methodology will continue to be refined to minimize discrepancy errors, with an emphasis on accessing demographic information.
17	Data for Integrated Treatment was collected separately from the community mental health data, until it was included in the community mental health data system in August 2012. This integration should provide more accurate, "linkable" counts to Tables 2 and 14. Integrated Treatment was also expanded to 2 other regions within SFY 2013.
