URS Table Number	General Notes
2a & 3	The increase in Total number of consumers served and Total number of consumers served in Community MH Programs from FY13 to FY12 is due to FYCCR Initiative. As more counties develop capacity to report encounters through the data warehouse, population reported on this table will increase.
4	The increase in Total number of consumers employed, Total number of consumers Not in Labor Force and the decrease in Total number of consumers unemployed due to as we have become involved in Client Level Reporting, we are required to include consumers from HCSIS who are registered, but did not necessarily receive a service for which an encounter was submitted. Not all counties report encounters for county based services, even though this number continues to increase each year. This means that numbers of consumers employed increases. We continue to report Medicaid consumers for who encounters are submitted. We collect employment information for the non-Medicaid population. As a result, these numbers have increased, and Medicaid populations are considered to be not in the labor force.
5a	The increase in Total number of consumers with Non- Medicaid Funding only, Total number of consumers with both Medicaid and Non-Medicaid Funding and decrease in Total number of consumers with Medicaid Funding only because more complete reporting of county based population, those who are registered, as well as those for whom encounters have been submitted. A lot of county base consumers have also received Medicaid services. Reporting on the complete list of HCSIS consumers resulted in increased numbers.
6	The increases in Total Number of Consumers Served in State Hospital at the beginning of the Year, Total Number of Consumers Served in Community Programs at the beginning of the year, Total Admissions to Community Program During the Year, Total Number of Consumers Served in Other Psychiatric Inpatient Settings at the beginning of the year, Total Admissions to Other Psychiatric Inpatient During the Year, and the decreases in Total Number of Consumers Served in Residential Treatment Centers at the beginning of the year and Total Admissions to Residential Treatment Centers During the Year, Average LOS of children (in facility < 1 year) who were state hospital residents at the end of the year and Average LOS of adults discharged from State Hospitals are due to as we have become involved in Client Level Reporting this year, we are required to include consumers from HCSIS who are registered, but did not necessarily receive a service for which an encounter was submitted. As numbers from previous years included figures from aggregate reporting, there may be little valid comparison between the numbers.
8 & 10	PA does not capture county allocation broken out by SMI/SED data. Figure in Adult SMI column represents the total amount given to the county, less Non-direct service activities funds that are listed in Table 8.
14a	The increase in Total number of American Indian/Alaska Native and Asian consumers with SMI/SED data because we are able to report on more county based consumers than before. This number will continue to increase as more counties regularly submit encounters on consumers utilizing their services. Previously, counties only reported on the aggregate. However, with the implementation of Consolidated Consumers Reporting Initiative, we have an increasing number of counties reporting encounters, resulting in our being able to more accurately report on this population; however, at the outset of this initiative, encounter submission is irregular. As time goes on, information on county based consumers will become more reliable.
15	The increases in total number of consumers living in Private Residence, total number in Jail/Correctional Facility and total number of Homeless/Shelter are due to increased reporting of county base encounters. As counties build capacity to report encounters, these numbers will continue to increase.
16	The decrease in Total number of consumers receiving Supported Housing services, Total number of consumers receiving Therapeutic Foster Care services, Total number of consumers receiving MST services and the increase in Total number of consumers receiving Supported Employment services are due to we are able to report on more county based consumers than before. This number will continue to increase as more counties regularly submit encounters on consumers utilizing their services. Previously, counties only reported on the aggregate. However, with the implementation of Consolidated Consumers Reporting Initiative, we have an increasing number of counties reporting encounters, resulting in our being able to more accurately report on this population; however, at the outset of this initiative, encounter submission is irregular. As time goes on, information on county based consumers will become more reliable.
