| URS Table Number | General Notes |
|------------------------------------|--|
| 2, 3, 6 | RI has no state psychiatric hospital, but rather adult psychiatric/forensic units in a general hospital and acute inpatient care contracted through private hospitals |
| 2, 3, 6, 12, 14, 15 | Only children served through the community mental health centers are included. |
| 3, 6 | The decrease in psychiatric hospitalizations is due to a decrease in use of our acute care contract beds because the contractor is working to divert clients from inpatient psychiatric hospitalizations to community based acute stabilization units when appropriate. |
| 6 | The average LOS has increased from 2012 to 2013 because with the aforementioned decrease in acute care bed use, the proportion of clients in the calculation who are in our long-term hospital instead (vs. acute care beds) has increased. |
| 8 | The increase in expenditures for non-direct service activities was due to a one year shift in funding of contracts previously associated with the MH Block grant. With the adoption of ACA, we anticipate the MH Block grant dollars will be reallocated towards service gaps created by ACA. |
| 9, 11, 11a, 16, 19a, 19b, 20a, 20b | Although we attempt to provide children's data for applicable tables, and are able to include children's counts of those served through the Community Mental Health Organizations, we do not have access to many of the measures relating to children in the listed Tables 9: Social Connectedness, 11/11a:Children's Consumer Survey, 16: Children with SED receiving Therapeutic Foster Care, Multi Systemic Therapy, or Family Functional Therapy, 19a:Criminal Justice Involvement, 19b: School attendance, and 20a/b: Hospitalizations for those under 18 |
| 16 | The increased number of consumers reported as receiving Supported Employment services is due to one of our larger Providers putting additional emphasis on providing this service. |
