**Note:**

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

**Table 3 State Notes:**

Age None  
 Overall None  
 Gender None

**Table 6 State Notes:**

Hospital None  
 Other Inpatient In general, only a small number of residents have been a resident more than a year. The reported counts across fiscal years can have a wide variation.  
 Residential None  
 Community None  
 Overall Age is measured at fiscal year-end, consumers discharged from residential treatment centers on or near their 18th birthday will appear in the report as adults. Additional notes See General Notes

Texas

URS Table Number	General Notes
5a	A client is counted as Medicaid if they were eligible at any time in the year.
6	NorthSTAR is included in local hospital starting in 2005. NorthSTAR had significant late reporting of other hospitalizations in 2005 resulting in an under reporting of approximately 1000 to URS.
10	Areas served are counties or statewide. Data includes NorthSTAR starting in 2008.
12	The increase in percent of adults served by the SMHA with co-occurring MH/SA diagnoses from 2011 to 2012 is due to the following: in 2012 the process of summarizing diagnosis information for a client was moved from a mainframe program to a warehouse load program that has access to the all diagnostic detail.
16	The introduction of Resiliency and Disease Management (RDM) to the Texas mental health service delivery system brought with it an integration of supported employment services within the delivery of evidence-based mental health services, such as counseling, psychosocial rehabilitative services, and case management. This integration brought changes in the manner by which supported employment services were recorded within the mental health service delivery system. The decreasing provision frequency of supported employment services from FY2005-FY2006 is likely the after effect of this integration and recording change.
16	Therapeutic Foster care has been discontinued in Texas and should be removed from future counts.
16	Contractual fidelity measures for ACT services were introduced in late 2005. These likely contributed to a reduction in ACT service volumes.
16	The increased in total number of consumers receiving Supported Housing services is due to increase the volume service and it has even been introduced as a contract measure for this coming year.
16	NorthSTAR began providing Supported Employment services in 2010 which accounted for most of the increase from the previous year.
17	Clients only served in the hospital have been removed from the client count. SA is counted via SA diagnosis authorized for ACT or Rehabilitative Case Management Service Packages (3 and 4). The Service Package criteria began in 2005 but more accurately reflects the best practice guidelines
