New Hampshire

URS Table Number	General Notes
All	NH was not able to de-duplicate client counts this year. 2014 numbers will not be comparable to past years.
9, 11, 11a, 19A & 19B	These tables are answered through New Hampshire's consumer survey. The survey is a stratified random sample and resulting numbers are weighted. Totals occasionally do not add up due to the weighting and rounding issues.
3	Counts this year and for years 2012 and 2014 are not de-duplicated as in past years. Counts for other psychiatric inpatient came directly from the facility and are duplicated in community mental health programs. There have been no changes to the other psychiatric inpatient facility and larger numbers in 2012, 2013, and 2014 are likely due to not being able to de-duplicate. Counts for residential treatment centers were not available in time this year and could not have been de-duplicated.
6	Data for state hospital comes directly from New Hampshire Hospital (NHH). NHH is not part of the State Mental Health Authority and data systems are different. It was noted that there is a difference in the median numbers from 2013 for patients discharged over 1 year. NHH was not able to provide any explanation for the large difference between 2013 and 2014.
16	New Hampshire went from having ACT services at only 2 of our CMHCs to having ACT at all 10 CMHCs during SFY 2014. This accounts for the dramatic increase in the number of consumers receiving ACT services.
