Note:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 43

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2013

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age is calculated as (6/30/2013-DOB)/365.25 and rounded down.
 Gender None
 Race Ethnicity is available only in MMIS and all those without record in MMIS are considered as non-Hispanic
 Overall Despite our best efforts to unduplicated this data, there could be about 0.5% duplication due to the imprecision of the matching method.

Table 2b

Age is calculated as (6/30/2013-DOB)/365.25 and rounded down.
 Gender None
 Race Ethnicity is available only in MMIS
 Overall Despite our best efforts to unduplicated this data, there could be about 0.5% duplication due to the imprecision of the matching method.

Oregon

URS Table Number	General Notes
4	The state is implementing a new database (Measures and Outcome Tracking System (MOTS)), replacing CPMS. Because of this transition some data were not complete reducing the 2014 numbers.
5A	The state chose to exclude consumers who received Evaluation and Management (E&M) services only there by reducing the 2014 count of consumers and accounts for the decrease in the total number of consumers with Medicaid funding only for 2013 to 2014.
6	Children state hospitals LOS data are not available.
6	The increase in total number of consumers served in state hospital at the beginning of the year, total admissions to community programs during the year, and total number of consumers served in other psychiatric inpatient settings at the beginning of the year from 2013 to 2014 are normal variation.
9	Because of a change in procedure codes used for billing, a large number of the clients sampled had no mental health services aside from Evaluation and Management procedures. This was not discovered until after data collection was well underway, which resulted in unusually small sample size and number of responses among adults. The impact of this issue on the youth survey was counterbalanced by three facts: (1) a larger proportion of the youth sample received non- Evaluation and Management mental health services; (2) the original sample size was increased by roughly 25%; and (3) an incentive was offered to respondents for the first time this year.
14A	Race identification is generally problematic and this data is drawn form 3 different systems (MMIS, CPMS, and State Hospital) each of which use different codes for the same race. MMIS also has recently changed its coding as it is in the process of matching the Federal specifications. In this process there has been category changes thereby affecting some groups disproportionately.
19A & 19B	Results reported are from client services survey conducted in 2014, sent by mail to samples drawn from clients who received mental health services between July 1 and December 31, 2013.
19A & 19B	Not able to differentiate between consumers in service for at least 12 months from those in service for less than 12 months.
19A	All adult client survey respondents were asked the same questions about their arrest history: "Were you arrested in the 12 months before starting treatment?" and "Were you arrested in the 12 months after starting treatment?"
19A	All YSS-F respondents were asked the same questions about their child's arrest history: "Was your child arrested in the 12 months before s/he began seeing his or her current provider?" and "Was your child arrested in the 12 months after he or she started treatment with this provider?"
19B	All YSS-F respondents were asked the same questions about school suspensions and expulsions: "Was your child suspended from school during the 12 months before he or she began seeing this provider?", "Was your child suspended from school in the first 12 months (or less) after he or she began seeing this provider?", "Was your child expelled from school during the 12 months before he or she began seeing this provider?", "Was your child expelled from school in the first 12 months (or less) after he or she began seeing this provider?"
19B	When merging suspension and expulsion into one item, records with "No" to one (either suspension or expulsion) and a missing or invalid response to the other were included in the "No response" category.
