URS Table Number	General Notes
2, 3 & 6	RI does not have a state psychiatric hospital, but rather adult psychiatric/forensic units in a general hospital and acute inpatient care contracted through private hospitals.
2,3,6,12,14, 15	Only children served through the community mental health centers are included.
3	Table 3 counts the number of state-funded clients in inpatient settings. As with table 16 (see notes) the data was collected in a fashion that has recently become unreliable. We did the analysis a different way and the numbers are now more consistent with the previous year which was also reanalyzed.
5A	Due to the Affordable Care Act and Medicaid expansion, funding was shifted from state dollars to Medicaid. RI has been very effective in getting its mental health clients signed up for Medicaid expansion, thus the increase in Medicaid funding in this table. In addition, budget cuts account for a reduction in state funding for services.
6	Total admissions: the prior data was reported incorrectly, they included readmissions for some medical patients that were non-psychiatric. This was due in part to how patients were classified; they were basing their status on the ward in which they resided as opposed to their diagnosis. This made sense at one point when the hospital size was more static, but as wards have been closed, this became a less accurate way of classifying patients. We have reworked how this data is collected. In addition to this change, there has been a drastic surge in forensic patients, both males and females over the past calendar year. As a result of increased forensic admissions, we have had to decrease the number of civil patients admitted to the hospital. These are patients that would be transferred from local community psychiatric hospitals. The average length of stay was lower in the past due to the inclusion of medical patients. In addition the LOS overall for psychiatric patients has nearly doubled due to the complexity of the patient population. Our patients come to our facility sicker and stay longer. This period of stabilization has increased; therefore length of stay has increased. An additional factor is availability of community placements. The community has limited resources and at times, discharge planning takes longer when a placement is unavailable at the time of pending discharge.
8	Funding for this work was moved to the Substance Abuse block grant
9, 11, 11A, 16, 19A, 19B, 20A, 20B	Although we attempt to provide children's data for applicable tables, and are able to include children's counts of those served through the Community Mental Health Organizations, we do not have access to many of the measures relating to children in the listed Tables 9: Social Connectedness, 11/11a: Children's Consumer Survey, 16: Children with SED receiving Therapeutic Foster Care, Multi Systemic Therapy, or Family Functional Therapy, 19a: Criminal Justice Involvement, 19b: School attendance, and 20a/b: Hospitalizations for those under 18
16	As health home programming has taken hold, supported housing teams have been replaced by health home teams. We continue to have a similar number of clients housed in the community, but they are not receiving that specific service, that has been replaced by health home services.
17	The EBPS are from point in time snapshots for clients served in a month. Therefore they are two different samples of clients that do not necessarily match.
17	Data regarding Family Psychoeducation and Illness Self Management are unavailable
20A	The numbers do look different from years past due to the new, correct way that we are reporting hospital data.
20B	We have never submitted table 20B because we do not, at this point, have a way of separating out the forensic from the non-forensic. However, we will be working with our IT and hospital staff to see if this is a tag that will be possible to insert on client data in the future with our new process.
