URS Table Number	General Notes
4	Since last year, changes were made to the format for reporting of employment status to allow more accurate identification of "Unemployed" versus "Not in labor force". The distribution of employment status in prior years will be significantly different from this year's distribution.
5A	Due to Affordable Care Act, funding for Non-Medicaid clients has been significantly reduced and the number of clients served in the "both Medicaid and Non-Medicaid" categories has increased since the beginning of 2014.
8	Although Washington State has served more mental health clients, the decrease funding of Non-Direct Service Activities from 2013 to 2014 is due to the drop off in contracting agencies.
14A	We categorized clients by taking into considerations through multiple sources of demographic information across our administrative systems instead of RSNs' periodic reports only resulting in an increase of total number of multiracial consumers with SMI/SED from 2013 to 2014.
15	Since last year, changes were made to the format for reporting of living situation to, in part, conform with requirements for reporting Client Level Data. The distribution of living situation in prior years will be significantly different from this year's distribution.
16, 17	Washington State did not conduct EBP survey in 2014 due to the changes and requirement of legislatures. We are in the process to re-design the EBP services for children and adults.
19A/19B	Washington State hasn't conducted MHSIP surveys for consumers who began mental health services during the past 12 months.
