## Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 15.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

## State Notes:

Living arrangement is not required reporting for individuals with Medicaid and/or Bureau charity care funding.

## West Virginia

URS Table Number	General Notes
All	The major provider of mental health services completed their transition to a new information system. Beginning with FY14 they were able to report nearly all of the required data elements. As a result of this reporting improvement, the Bureau did not need to use the alternative method used for FY13 reporting. The reporting for FY14 is now consistent with the reporting prior to FY13. The increase in the number of people served is due to the improved reporting by the provider.
All	A unique identifier is assigned to all community and hospital consumers regardless of age or disability. Unduplication is accomplished by merging multiple identifiers for a person into a single identifier. Information such as name, date of birth, social security number, Medicaid ID, county of residence, and gender are used to identify cases that may warrant being merged. Access to the Medicaid database is also available and is used to confirm name changes as well as used to determine records to be merged. Medicaid claims files are used as well to confirm the provider and date of service prior to merging cases requiring further investigation. Approximately 150 records are merged each day.
All	Ethnicity is not collected by the hospitals. When an individual receives services from both a community program and a hospital, the ethnicity reported by the community program is used.
2A	Race/Ethnicity: An individual may select more than one race category. If one initially selects only one race and, subsequently, selects a different race; they are considered as having chosen more than one race. If more than one race is selected at any time, they will always be reported as more than one race. In previous years, the last reported race was used when more than one race had been reported. Cases have been identified where an individual may select the majority of available race categories; however, this occurs infrequently and is not considered significant.
4a, 9, 11, 11a, 19a, 19b	Tables 4a, 9, 11, 11A, 19A, and 19B were not completed or only partially completed depending on the availability of data. No Adult MH Satisfaction survey was conducted during FY14. BBHMF is attempting to identify an acceptable vendor to conduct the survey.
20A	The State operated hospitals have been at capacity. This results in many readmissions being sent to local psychiatric units. The readmission rate for FY 2014 will be less than FY 2013 as a result.
20B	53% of the readmissions are due to a transfer or change in legal statuses which are reported as a readmission within the reporting system.
21	20% of the readmissions are due to a transfer to another facility which are reported as a readmission within the reporting system.
