URS Table Number	General Notes
5A	Increase in total number of clients with both Medicaid and non-Medicaid funding between FY2013 and FY2014 is due to a change in the collection process to better account for clients who received non-Medicaid services while on Medicaid.
5A	Discrepancy in data reported in tables 2a and 5a are a result of using different files where data source for table 5a is a static file that does not include the Utah State Hospital data, while the data source for table 2a includes data from the Utah State Hospital.
8	More money was used for data collection and recovery and resiliency programs in FY2014 accounting for the increase in total MHBG expenditures for non-direct services between FY2013 and FY2014.
15	The decrease in the number of consumers in jails/correctional facility between FY2013 and FY2014 may be due to a change in the way the data is collected which allows for more unknowns in many of the fields. We will be making corrections to this for future data submissions.
17	The increase in consumers receiving Family Psychoeducation services, Illness Self Management services, and Medication Management services are most likely due to better data reporting by our providers; there were more EBPs reported then last year.
