URS Table Number	General Notes
4	<p>It is a more appropriate way to look at these tables is by comparing the clients in a given category as a percent of the total clients served. Otherwise, the increase in total number served from 2014 to 2015 is confounded with increases in the number of clients in the employment categories. Further, the % of clients where employment data was "Not Available" dropped from 35% in 2014 to 25.6% in 2015. This would contribute to an increase in the number of clients reporting in other categories. For employed, 6.9% of the total in 2014 vs. 11% of the total in 2015. This is a substantial increase that may be attributed to either 1) a change in the nature of clients being served as a result of Medicaid expansion (It is likely that the "newly eligible" are less disabled and – as a result – more likely to be employed.) or 2) the improving economy in Washington State. For unemployed, 11.4% of the total in 2014 vs 13.8% of the total in 2015. As previously stated, the % of clients where employment data was "Not Available" dropped from 35% in 2014 to 25.6% in 2015. This relatively small increase may be reflecting clients shifting out of the "Data Not available" category. For "Not In Labor Force", 49.6% of the total in 2014 vs 46.7% of the total in 2015. As previously stated, the % of clients where employment data was "Not Available" dropped from 35% in 2014 to 25.6% in 2015. This relatively small decrease may be reflecting clients shifting out of the "Data Not available" category or result from and increasing number of clients being employed.</p>
5A	<p>The increases in total number of consumers with Medicaid Funding only and decreases in total number of consumers with Non-Medicaid and both Medicaid and Non-Medicaid Funding are likely the result of Medicaid expansion in Washington State which would result in an increase in the % of clients served by Medicaid.</p>
6	<p>As with table 4, a more appropriate way to look at these tables is to control for the increase in clients served from 2014 to 2015 by dividing number of Psyc IP admits by the total number of clients served. When examined in this manner the change is from 7% of the total in 2014 to 7.6% of the total in 2015. This is a relatively small change and may be related to increases in capacity in FY2015.</p>
10	<p>The credits reflected in this table for some providers are the result of liquidating SFY14 accruals in SFY15. In SFY14 the Mental Health program had additional state funds to spend at the end of the fiscal year, it was determined that the program would move federal MHBG expenditures (\$2.30 million) to General Fund-State to spend some of these state dollars, an accrual was established in SFY14 to account for this, and subsequently liquidated in SFY15. The credit balances for providers in Table 10 is a result of the liquidations processed were more than the actual expenditures incurred in SFY15.</p>
14A	<p>The increases in total number of male/female, Asian, Multi-racial consumers with SMI/SED are related to changes in the profile of "newly eligible" clients served as a result of Medicaid expansion.</p>
15	<p>The decrease in total number of consumers in Jail/correctional facility may be related to the improving economy in Washington state. The increase in Homeless clients may be related to changes in the profile of "newly eligible" clients served as a result of Medicaid expansion.</p>
16 & 17	<p>Due to the changes and requirement of legislatures, we are in the process of redesigning EBP services for children and adults.</p>
19A & 19B	<p>Washington State hasn't conducted MHSIP surveys for consumers who began mental health services during the past 12 months.</p>
