**Note:**

**Are Client Counts Unduplicated?** Unduplicated **Number of States with Unduplicated Counts** 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2014

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**

**Table 2a**

Age is calculated as of January 1, 2015  
 Gender None  
 Race See General Notes  
 Overall The decrease in total served from 2014 is primarily due to the decrease in adult admissions into the community programs.

**Table 2b**

Age None  
 Gender None  
 Race Ethnicity is not collected by any of the inpatient facilities.  
 Overall The non-reporting of Hispanic/Latino has increased greatly from the previous year. The reason for the decreased reporting is unknown. The ratio of Hispanic/Latino to Not Hispanic/Latino has increased slightly from the previous year.

**STATE West Virginia**

	<b>Expenditures: State</b>	<b>Percent of Total Expenditures: State</b>	<b>Expenditures: U.S.</b>	<b>Percent of Total Expenditures: U.S.</b>
State Hospitals-Inpatient	\$54,100,000	32%	\$9,377,004,070	23%
Other 24-Hour Care	\$23,500,000	14%	\$7,332,863,616	18%
Ambulatory/Community	\$92,700,000	54%	\$23,267,025,494	57%
Total	\$170,800,000	-	\$40,831,941,068	-

**Note:**

Other 24-Hour Care includes state psychiatric hospital and community based other 24-hour as well as community based inpatient expenditures.

Ambulatory/Community includes expenditures for less than 24-hour care services provided at state psychiatric hospitals. It excludes community based other-24 hour and community based inpatient expenditures.

Total also includes additional SMHA Expenditures for research, training, administration, and other central and regional office expenditures.

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2014 reports - Table 18 "SMHA-Controlled Expenditures for Mental Health Services."

U.S. totals are based on 50 states reporting.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:

West Virginia

URS Table Number	General Notes
2A	WV has a "race other" option which is added to Race Not Available. Also, Individuals can select multiple race categories. Race categories selected may not be consistent over time. When this occurs the category "More Than One Race" is selected for reporting purposes.
4	In previous years the Bureau began to provide feedback on the quality of data reported. This impact has improved the reporting of employment data. The count of individuals for whom the data are Not Available or Unemployed decreased significantly in FY 2015 and improved the reporting for the other categories.
6	The reporting for FY 2015 is the first year in which a computer application is used to generate reports upon which the URS tables are based. In prior years the data were manually manipulated to develop the reports. One deficiency in the reporting system is the providers not reporting discharges. One manual activity prior to FY 2015 was to determine if there was a 90 day break in services and, if so, consider it as a discharge with a subsequent FY 2015 readmission. The application used in FY 2015 does not look for a break in service provision. As a result, people who had a break in services in FY 2014 but began to receive services again in FY 2015 are reported as receiving services at the beginning of FY 2015. Prior to FY 2015 people in this scenario would have been reported as a FY 2015 readmission.
12, 16	In previous years providers responded to a field which indicated whether or not the individual met the definition for SMI/SED. This field is no longer reported. Beginning in FY 2015 the diagnosis was used to make the determination. Diagnoses which do not meet the coding requirements are not considered which reduces the number of individuals reported as having an SMI/SED diagnosis.
14A, 14B	In previous years reporting of SMI/SED was based on a response to a field which indicated whether or not the person was SMI/SED. Beginning with this year, the determination of SMI/SED is based on diagnosis. Diagnoses which do not comply with reporting standards are not considered. The invalid diagnoses results in a decrease of the number of SMI/SED reported in this year.
16	Supported Housing reported a significant decrease in the count of people receiving the service in FY 2015. This service serves a significant number of people who have an IDD diagnosis as well as an MH diagnosis. It is suspected that because of the IDD funding source for this service, the disability being reported has changed from a co-occurring disability to a single disability of IDD.
20A, 21	In compliance with Bureau policy, transfers between facilities are reported as a discharge and readmission. This change primarily affects the readmission rate for table 20A. Table 21 is minimally impacted because of the number of admissions is much higher than for State operated facilities.
20A, 20B, 21	The hospitals only collect and report on a single race category. However, WV uses a unique identifier which goes across community and hospital data. Race is pulled from the unique identifier which uses race reported to community providers in addition to race reported to the hospital. The number of people reported as More Than One Race is due to multiple races being selected with the community providers.
