

**Center for Behavioral Health Statistics and Quality, SAMHSA,
HHS**

**Behavioral Health Research Reports on Substance Abuse and Mental
Health among Women and Girls, published from 2001-2014**

**Prepared by Emily Goettsche, Tarah Griep, and Margaret Mattson with assistance
from Research Triangle Institute.**

The publications listed here are Short Reports and Spotlights produced by the Center for Behavioral Health Statistics and Quality that focus, in particular, on women and/or girls, although many other of the DASIS, DAWN, and NSDUH reports present gender-specific data. Publications are listed by date of publication, not year of data represented, and contain a link to the report. Other related publications can be found on SAMHSA's publications listing at: <http://store.samhsa.gov/home>. SAMHSA's home page is <http://www.samhsa.gov>. The bibliography is current as of December 2, 2014.

CBHSQ was established in 2011 as the government's lead agency for behavioral health statistics, and its goals are to:

- Provides national leadership in behavioral health statistics and epidemiology
- Promotes basic and applied research in behavioral health data systems and statistical methodology
- Designs and carries out special data collection and analytic projects to examine issues for SAMHSA and other federal agencies
- Participates with other federal agencies in developing national health statistics policy
- Consults and advises SAMHSA's Administrator and the Department of Health and Human Services' Secretary on statistical matters
