State Notes:

Age None
 Gender None
 Overall Table populated by NRI using Alabama's data reported through 2017 MH-CLD

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2017

Alabama

Reporting Period: 10/1/2016 To: 9/30/2017

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	90.9%	72.0%	71.0%	54
Percent of Children served through the SMHA who meet the Federal definition for SED	97.2%	70.9%	68.0%	54

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	19.3%	25.4%	23.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	1.5%	6.2%	4.0%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	19.2%	23.3%	21.0%	53
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	1.5%	5.1%	3.0%	53

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Primary ICD 10 Diagnosis and Primary ICD 10 Substance Abuse Diagnosis are captured in the DMH Central Data Repository for each client served. If the client has a diagnosis in both of these fields, the client is counted as having a co-occurring.

General Notes FY 2017

Alabama

URS Table Number	General Notes
	This is the fifth year for Alabama to report Client Level Data.
4	The decrease in total number of consumers Not in Labor Force can be explained: In the last several years, the community mental health centers have been implementing the initiation of Electronic Health Records. ADMH has worked diligently with these providers through this process as it caused significant data reporting issues. ADMH is hopeful that the community providers have worked through their data implementation issues and that FY17 is reflective of accurate data.
6	Children - The State hospital adolescent data that was previously reported from our legacy state hospital system has been migrated to a new system. Reporting capacity from the new system is currently being developed. Adults- From 2011-2015, ADMH closed three state hospitals. To achieve this, ADMH partnered with community providers to serve committed patients that would meet the criteria for acute care need (short LOS). This shifted the role of state hospitals to care for committed patients that need extended care (longer LOS) which means the state hospitals are serving the most complex adults that are either under a Civil or Circuit Court Commitment.
14A	SMI Definition: Person who meets the diagnosis and disability criteria or who meet the criteria for high risk. Disability Criteria (must meet at least 2 criteria plus diagnosis criteria). (1) Is unemployed, is employed in a sheltered setting or has markedly limited skills and a poor work history. (2) Shows severe inability to establish or maintain personal social support systems. (3) Shows deficits in basic living skills. (4) Exhibits inappropriate social behavior. High Risk (must meet one of the criteria). (1) History of DMH/MR supported inpatient or public residential treatment as a result of an Axis I Mental Illness diagnosis. (2) Person would become at imminent risk of needing inpatient hospitalization without outpatient intervention.
14A	SED Definition: Person must meet the diagnosis criteria and Separation from Family or meet diagnosis criteria and Functional Impairments/Symptoms/Risk of Separation Criteria
