When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
AS	Yes	Yes	-	Yes	-
US	42	29	4	5	27

**Note:**

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

**State Notes:**

Age                      None

Gender                 None

Overall                There were 20 consumers employed during the 2017 reporting period. 17 cases were discharged. This accounts for the change in the percentage of consumers employed this year.

**Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2018**

General Notes FY 2018

American Samoa

URS Table Number	General Notes
3	Of the seven reported as receiving services at the State Psychiatric Hospital, 4 were in jail/correctional facility. These four individuals are now civilly committed while the other 3 were involuntarily hospitalized.
4	Twenty consumers were reported as being employed in the 2017 reporting period. Of the 20, 17 were successfully discharged.
9	The decrease in the percentage of persons reporting positively about social connectedness is due to the number of respondents who completed the survey and the increase in successful discharges.
17	Fidelity measures is still a priority for this year as the services and Electronic Health Records are solidified.
7	Original amounts reported in this table reflected the planned expenditures for each category as it was reported in the 2018-2019 CMHBG Report. Amounts have been revised to now reflect the actual expenditures by the categories that apply to American Samoa's CMHBG programs and services.
7a	Original amount reported in this table reflected the planned expenditures for ESMI related services and activities. The revised amount now reflects actual expenditures toward ESMI requirement.
8	The change (decrease) in the amount of MHBG expenditures for Non-Direct Service Activities from 2017 to 2018 is the result of key program personnel changes. The transitioning and adjustment of a new program manager impacted the implementation of services.
14A	The reduction in the number of SMI consumers reported for this year is due to the increase in successful discharges and consumers relocating off-island.
16&17	The consumers listed on tables 16 & 17 are all in the 21-64 age group.
17	Fidelity measures is still a priority for this year as the services and Electronic Health Records are solidified.
