**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

The state reporting system has a specific reporting field for "co-occurring substance abuse disorder." DBHS believes, however, that the count produced is suppressed because some providers believe that identifying an individual as having a "co-occurring disorder" can have an adverse impact when seeking prior-authorization of Medicaid services.

General Notes FY 2017

Arkansas

URS Table Number	General Notes
5A & 5B	Payor source is defined as the "First Payor Billed," which in the case of Medicaid is also usually the ultimate Payor for the service. "Medicaid (only Medicaid)" is an unduplicated count of those for whom Medicaid was the First Payor Billed for the last service provided during the state fiscal year. "Non-Medicaid Sources (only)" is an unduplicated count of those for whom some payor source other than Medicaid was the First Payor Billed for the last service provided during the state fiscal year.
6	Total served at beginning of year - one facility up 29% and three other facilities went from zero patients in 2016 to serving patients in 2017. Admissions during year - in 2017, 7 of 9 facilities saw decreases in admissions ranging from 14-69%.
15	Providers are not required to update this status at defined intervals, only when it changes. These changes are collected on an ongoing basis as an attribute of transactions which are the substrate upon which URS reporting is based.
16 & 17	Data on EBPs is based on aggregate data reports from providers. Client level data on EBPs is not reported, the number served is not unduplicated and breakouts of demographic variables are not reported. For SMI/SED client level data is reported, the count is unduplicated and the demographic break outs are reported in tables 14A and 14B.
21	Arkansas elected not to report table 21.
