Note:
This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2017

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

General Notes FY 2018

Florida

| URS Table Number | General Notes |
|------------------|--|
| 6 | We are in the process of implementing a new statewide data collection system, scheduled for production January 2019. Due to testing and preparation on the part of the providers some records such as admissions and discharges were delayed in being submitted. Fewer clients returned from last year, offset by a slight increase in the number of new admissions, some admissions were delayed, with the result being a small increase in total number of clients from last year. |
| 6 | For total admissions to OPI: Small overall change in actual number of clients, typical of year to year variation. Numbers are verified. |
| 6 | LOS in SPH: Several discharges were submitted late, artificially inflating the avg length of stay at the time of reporting. |
| 7 | Increase in total administration expenditures is a result of the increase in block grant allocation this year coupled with the inclusion of additional discretionary grants. |
| 15 | Increase in the total number of consumers in jail/correctional facility is a result of improved data reporting (fewer 'unknowns' reported this year). |
| 16 | Hurricanes this year created an increased need for temporary housing resulting in an increase in the number of consumers receiving supported housing. |
| 16A | The State does not currently collect FEP data in this manner. |
