US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

- Age There may be duplication in the 18-20 year category for those clients that received both children and adult services during the year.
- Gender None
- Overall Some individuals have both community mental health and PNMI services.
