\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Respondents were classified as needing illicit drug use treatment if they met the DSM-IV criteria for an illicit drug use disorder or received treatment for illicit drug use at a specialty facility (i.e., drug and alcohol rehabilitation facility [inpatient or outpatient], hospital [inpatient only], or mental health center).

<sup>a</sup> The difference between this estimate and the 2018 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>1</sup> Perceived Need for Illicit Drug Use Treatment includes persons who did not receive but felt they needed illicit drug use treatment, as well as persons who received illicit drug use treatment at a location other than a specialty facility but felt they needed additional treatment.

Definitions: Measures and terms are defined in Appendix A.
