Are Client Counts Unduplicated?  
Unduplicated

Number of States with Unduplicated Counts  
43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2017.

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA’s Block Grant Regions.

</tbody>
</table>

**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

There are two steps to identifying co-occurring clients in our USTF database: 1. Do they meet the SMI requirement of a GLOF of 0-5? 2. Do any of the following areas in the database indicate drug or alcohol abuse: 1. Referral Source (e.g. from Alcohol & Drug Treatment Program); 2. Past Services History; 3. Current Services Involvement; 4. Non-Mental Health Needs; 5. Primary Problems. There are two steps to identifying co-occurring clients in our USTF database: 1. Do they meet the SMI requirement of a GLOF of 0-5?; 2. Do any of the following areas in the database indicate drug or alcohol abuse: 1. Referral Source (e.g. from Alcohol & Drug Treatment Program); 2. Past Services History; 3. Current Services Involvement; 4. Non-Mental Health Needs; 5. Primary Problems. If both criteria are met, then the consumer is coded as a co-occurring client.

#### Note:

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7</td>
<td>Total Medicaid Expenditures: in FY 2017 and in years past, the Division of Mental Health and Addiction Services (DMHAS) only included the Medicaid Disproportionate Share Hospital (DSH) expenditures at the State psychiatric hospitals. Other Medicaid-related funding was not directly appropriated to the Division. However, in State Fiscal Year 2018, we are including funding that is appropriated to the Division and transferred to the State Medicaid Division, i.e., the Division of Medical Assistance and Health Services. This includes both State and Federal funding for mental health-related expenditures incurred in Medicaid. These funds are now appropriated in DMHAS as a result of our transition to a Fee-for-Service reimbursement payment.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7</td>
<td>Total Other Federal Funds Expenditures: the Other Federal Expenditures line reflects third party costs funded by the Federal PATH formula grant and other restricted grants, and administrative expenditures for qualifying federal initiatives. The FY17 expenditure amount included the PATH award in the amount of $2,139,241 and $166,454 in expenditures from the Social Services Block Grant (SSBG) related to Superstorm Sandy. In FY18, there was a slight decrease in the PATH grant and all funding from the SSBG ceased. However, in SFY18, the estimated federal share of the State's Interim Managing Entity for Community Support Services was included.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7</td>
<td>Total Other Expenditures: the $400K in 2018 was included in 2017 in the “State Funds” column. This represents funding for the “Cop2Cop” helpline for law enforcement personnel. This program is supported by dedicated funding sources, i.e., it is not appropriated in the State's General Fund. We have therefore shifted it to the “Other” column.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7</td>

<tr>
<td>16</td>
<td>The total number of children with SED that received specific services in Table 16 was 47,315. This number was reported by NJ Children’s System of Care (CSOC). This number cannot be compared with the number (7,105) provided in FY 2017. The total number of children with SED that received specific services in FY 2017 (i.e., 7,105) was reported by SMHA based upon the number served by age group in Table 14A.</td>

<td>The decrease in the reported number of consumers receiving Supportive Housing services (6,063 adults with SMI in SFY17 and 4,014 in SFY 18) most likely is related to the phase-in of Community Support Services (CSS), which began in SFY18. The roll-out and transition from Supportive Housing to CSS was not a smooth process with regard to reporting. Many agencies continued to submit QCMRs for Supportive Housing well into SFY18, and many agencies didn’t begin submitting QCMRs for CSS until much later in SFY18.</td>

<td>During SFY 2018 while monitoring monthly utilization data, CSOC became aware of significant decreases in the provision of MST services in two New Jersey counties – Essex and Camden. Designated staff CSOC reached out to each provider agency to determine the cause and assist in developing a plan of correction. In Essex County the MST provider agency had experienced a complete turnover in staff resulting in a loss of community engagement. The plan of correction for Essex County involves re-marketing the MST services. A community “Kick-Off” is being planned and will include the courts, juvenile justice agencies, families, all partners within the children’s system of care including care management organizations, mobile response and stabilization services, family support organizations, CIACCs, education and other stakeholders. In Camden County, the MST provider agency reported difficulty in hiring due to what was perceived as insufficient salary by prospective employees. The MST provider agency met with CSOC and received approval for staffing reorganization. Salaries have been increased and CSOC continues to monitor staffing as well as provision of services.</td>
