Notes:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

- Age Age calculated at midpoint of reporting period
- Gender None
- Overall Populated by NRI using Rhode Island's 2018 MH CLD-BCI dataset.

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2018

Rhode Island

Reporting Period: 7/1/2017 To: 6/30/2018

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	73.8%	70.3%	73.0%	56
Percent of Children served through the SMHA who meet the Federal definition for SED	40.2%	69.7%	69.5%	54

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	53.0%	27.5%	27.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	16.0%	4.2%	3.0%	53
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	55.0%	25.7%	24.0%	55
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	15.0%	7.3%	3.0%	52

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Clients in a mental health program who have 'Yes' for co-occurring diagnosis indicator and/or have a primary substance of abuse listed.

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
RI	Yes	Yes	-	-	Semi-annual
US	42	29	4	5	27

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

- Age Age calculated at midpoint of reporting period
- Gender None
- Overall Populated by NRI using Rhode Island's 2018 MH CLD-BCI dataset.

Rhode Island

URS Table Number	General Notes
2A/B, 3, 6	RI has no state psychiatric hospital, but rather adult psychiatric/forensic units in a general hospital and acute inpatient care contracted through private hospitals
2A/B, 3, 6, 12, 14A/B, 15	Only children served through the community mental health centers are included.
3	Table 3 counts the number of state-funded clients in inpatient settings. Because of the affordable care act, RI ended its Respect contract as of December 31, 2013 which provided state funding for these services and the numbers of clients served was reduced.
5A/B	Due to the affordable care and Medicaid expansion funding was shifted from state dollars to Medicaid. RI has been very effective in getting its mental health clients signed up for Medicaid expansion, thus the increase in Medicaid funding in this table. In addition, budget cuts account for a reduction in state funding for services.
6	Our biggest CMHC has not been reporting data since Feb 2018. This accounts for the decrease in community programs and can be resubmitted when they are reporting again. No explanation for average LOS for adults in state hospital for less than a year. We are confident the numbers are correct.
7	The reason for the increase for table 7 is a shift in dollars from sub-recipients to more resource development. This is due to the majority of our MH services being covered by third party insurance.
9, 11/11A, 16, 19A/19B, 20A/20B	Although we attempt to provide children's data for applicable tables, and are able to include children's counts of those served through the Community Mental Health Organizations, we do not have access to many of the measures relating to children in the listed Tables 9: Social Connectedness, 11/11a:Children's Consumer Survey, 16: Children with SED receiving Therapeutic Foster Care, Multi Systemic Therapy, or Family Functional Therapy, 19a:Criminal Justice Involvement, 19b: School attendance, and 20a/b: Hospitalizations for those under 18.
12	The low 2017 percentages of adults and children with SMI/SED is a result of a data quality issue. In our transition both to a new data system and from ICD-9 to ICD-10, we lost a great deal of diagnoses. This should not happen moving forward.
