URS Table Number	General Notes
3 and 6	The reduction in the state psychiatric hospital admissions are due to taking 2, 15 bed units off-line because of staff shortages and also more patients being served near their communities in facilities the psychiatric hospital contracts with. DATA EDIT: SD has three long term care nursing home units at the state psychiatric hospital. The increase is due to long term patients being reported as discharged after passing away. There is a potential for even higher numbers dependent upon long term patients coming to end of their lives.
7	The increase in Medicaid, other federal, state and local expenditures from 2017 to 2018 is due to the addition of state hospital expenditures.
7	The one year change in "other" administrative expenses was a reduction in availability and expenditures of other funds.
7A	DATA EDIT: as two FEP providers became established, direct service costs increased.
12	The Division of Behavioral Health cannot accurately report the number of individuals who have a diagnosis of substance abuse problem or who have a dual diagnosis of substance abuse and mental illness at this time. However, the Division continues to work with providers on capturing this data.
14A and B	State definition of SMI (ARSD § 67:62:12:01): The client shall be 18 years of age or older and (1) shall meet at least one of the following: (a) The client has undergone psychiatric treatment more intensive than outpatient care and more than once in a lifetime, such as, emergency services, alternative residential living, or inpatient psychiatric hospitalization; (b) The client has experienced a single episode of psychiatric hospitalization with a diagnosis of a major mental disorder; (c) The client has been treated with psychotropic medication for at least one year; or (d) The client has frequent crisis contact with a community mental health center, or another mental health provider, for more than six months as a result of a mental illness; and (2) The client shall meet at least three of the following criteria: (a) The client is unemployed or has markedly limited job skills or poor work history; (b) The client exhibits inappropriate social behavior that results in concern by the community or requests for mental health or legal intervention; (c) The client is unable to obtain public services without assistance; (d) The client requires public financial assistance for out-of-hospital maintenance or has difficulty budgeting public financial assistance or requires ongoing training in budgeting skills or needs a payee; (e) The client lacks social support systems in a natural environment, such as close friends and family, or the client lives alone or is isolated; or (f) The client is unable to perform basic daily living skills without assistance.
14A and B	State Definition of SED (ARSD § 67:62:11:01): To be eligible for services the clinical record shall contain documentation that indicates: (1) At least one child in the family under the age 18 meets the criteria of SED as defined in SDCL 27A-15-1.1; or (2) At least one youth 18 through 21 years of age who needs a continuation of services started before the age of 18, in order to realize specific goals or assist in the transition to adult services and meets the criteria of SED defined in SDCL 27A-15-1.1(2)(3)(4) and (5).
17	Community Mental Health Centers are improving the delivery of integrated treatment, individuals with co-occurring issues are able to receive services within their own community, rather than having to move to an unfamiliar service provider to receive the services they need/want. The Division is hopeful that this shift in philosophy continues and that service delivery provides a more welcoming, respectful and hopeful atmosphere for individuals and families receiving services.
20A and 21	Thirty day readmissions of civil commitment and volunteer patients - The state hospital has been continually working towards reducing the number of 30-day readmissions. Each readmission is reviewed by medical staff and administration. The hospital works with facilities these patients are coming from (i.e. jail) looking for solutions.
