## ONE IN TEN OLDER ADOLESCENTS ARE CURRENT SMOKERS

In the United States, people younger than age 18 cannot legally buy cigarettes. Although across all age groups smoking has declined since 2002,<sup>1</sup> teen and young adult smoking remains a public health concern. According to the 2014 National Survey on Drug Use and Health (NSDUH), rates of cigarette use were lower among underage smokers than among adults in most age groups. For example, about 1 in 30 (3.4%) people aged 14 to 15 and 1 in 10 people aged 16 to 17 (10.2%) smoked cigarettes in the past month. In contrast, nearly 1 in 4 people aged 18 to 20 (24.0%) and 1 in 3 people aged 21 to 25 (31.0%) smoked cigarettes in the past month.

Research shows that the earlier people begin to smoke cigarettes, the less likely they are to quit.<sup>2</sup> For this reason, educating youth on the risks of smoking before they begin is a central public health concern. Focusing on preventing or stopping underage smokers can improve the health of the Nation. Information on the Substance Abuse and Mental Health Services Administration's (SAMHSA's) efforts to prevent underage smoking and to reduce tobacco use by people of all ages can be found at <http://www.samhsa.gov/atod/tobacco>.

Past Month Cigarette Use among People Aged 12 or Older, by Age Group: 2014

Source: National Surveys on Drug Use and Health (NSDUH), 2014. The NSDUH is an annual survey sponsored by the Substance Abuse and Mental Health Services Administration (SAMHSA). The survey collects data by administering questionnaires to a representative sample of the population through face-to-face interviews at their places of residence.

The Substance Abuse and Mental Health Services Administration (SAMHSA) is the agency within the U.S. Department of Health and Human Services that leads public health efforts to advance the behavioral health of the nation. SAMHSA's mission is to reduce the impact of substance abuse and mental illness on America's communities. The Data Spotlight may be copied without permission. Citation of the source is appreciated.
