Florida

URS Table Number	General Notes
4	Total number of consumers employed – Data has been reviewed and is correct. Considering the total clients served in 2A as a denominator this represents a change of less than 1% of total clients from last year, and in both years the ratio of employed to total clients is identical.
6	Improved reporting due to our new data system. Changes implemented with our new data system at the beginning of the fiscal year may have caused providers to discharge and readmit clients in order to convert data over from the old system. In some cases (Psychiatric Inpatient and Residential) this changed the proportion of new admits to continuing clients. We expect this to be resolved this year. We verified the average LOS for facilities < 1 year and we do not feel this represents a significant change given the variability between individual client stays.
7	Evidence-Based Practices for ESMI had new teams added. Admin totals are correct and within the allocated budget amounts.
