Maryland

URS Table Number	General Notes
6	Increase in the number served in the community account for the fact that SUD residential services moved into the PBHS and out of grant funded.
12	The number of co-occurring individuals has decreased due to the fact that the state has revised the way in which we are grabbing the count for this population. In the past we have based a co-occurring status based on primary mental health diagnosis with a secondary substance use diagnosis. In FY17, the state broadened that population to also include those individuals with a primary mental health diagnosis and who also answered, "Yes" to the question, "Do you have substance use problem?" at the time of service authorization. This year it was based solely on secondary diagnosis.
15	At this time, there are no known reasons for the decrease in the total number of consumers in jails/correctional facilities. We are looking into reasons behind the decrease.
16	Supported employment efforts in Maryland have always been a key priority. Program staff accounting increase due to increased grant efforts.
