**Note:**

This table uses data from URS Tables 2a, 2b, 14a, and 14b.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State used Federal SMI Definition? Yes  
 This is the fourth year where data was collected via BH-TEDS, which includes a question on whether the consumer has an SMI or SED. We used the information from this BH-TEDS question rather than our previous approach of determining SMI and SED from diagnoses.

Diagnoses included in State SMI definition -  
 State used Federal SED Definition? Yes  
 -  
 Diagnoses included in State SED definition -

**Note:**  
 US totals are based on states reporting.  
 This table uses data from URS Table 19b.  
 US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**  
 Michigan did not implement the MHSIP and YSS surveys during 2019. The Quality Improvement Council will determine what populations to include in the next survey and whether a different set of surveys should be implemented.

**Outcomes Domain: Change in Social Connectedness and Functioning, FY 2019**

**Michigan**

**Reporting Period: 10/1/2017 To: 9/30/2018**

Indicators	Children				Adults			
	State	US Average	US Median	States Reporting	State	US Average	US Median	States Reporting
Percent Reporting Improved Social Connectedness from Services	-	87.6%	84.4%	45	-	75.8%	72.8%	51
Percent Reporting Improved Functioning from Services	-	72.4%	66.8%	44	-	76.0%	73.1%	51

**Note:**

This table uses data from URS Table 9.

US State Averages and Medians are calculated only with states which used the recommended Social Connectedness and Functioning questions.

<b>Adult Social Connectedness and Functioning Measures</b>	<b>State</b>	<b>US</b>
Did you use the recommended new Social Connectedness Questions?	-	49
Did you use the recommended new Functioning Domain Questions?	-	49
Did you collect these as part of your MHSIP Adult Consumer Survey?	-	47

<b>Children/Family Social Connectedness and Functioning Measures</b>	<b>State</b>	<b>US</b>
Did you use the recommended new Social Connectedness Questions?	-	46
Did you use the recommended new Functioning Domain Questions?	-	45
Did you collect these as part of your YSS-F Survey?	-	44

Michigan

URS Table Number	General Notes
6	Beginning this current year, Michigan switched to the AVATAR system for state inpatient data. While this information is extremely accurate, it is not currently linked to the state's encounter data. As a result, Michigan is not able to determine how many individuals did not receive community services and only received services while in a state inpatient facility.
7	The FY19 increase is the result of increase in staff and cost allocation.
7A	Michigan increased the contract to spend more of First Episode Psychosis Expenditures 10% set aside.
12	For the current year disability type was not reported for approximately 30,000 people served. Given this, Michigan could not determine whether these individuals had serious mental illness, or serious emotional disturbance (SED) for children, or were mild/moderate.
14A/B	This is the third year where data was collected via BH-TEDS, which includes a question on whether the consumer has an SMI or SED. We used the information from this BH-TEDS question rather than our previous approach of determining SMI and SED from diagnoses.
14A	For the current year one of the very large and racially and ethnically diverse mental health agencies took steps to more accurately report race. In the previous two years, this agency had defaulted to reporting most individuals in a minority racial group as 'more than one race'. For the current year this agency made efforts to assign individuals to that person's specific racial group.
15	Michigan notes SAMHSA's observation that the number of consumers in jail increased 92% between the previous and current reporting year. While Michigan can't point to statistical data that would definitively link these trends to programmatic reasons, anecdotally what SAMHSA has noted is further confirmation of what the field (law enforcement, courts, CMH's etc.) have been stating. This is in part what prompted the last administration's C.A.R.E.S report ( <a href="http://gophouse.org/wp-content/uploads/2018/01/HouseCARES_Report.pdf">http://gophouse.org/wp-content/uploads/2018/01/HouseCARES_Report.pdf</a> ) and continues in the current administration's Michigan Joint Taskforce on Jails and Pretrial Incarceration. The latter group has just concluded their findings in a final report and recommendations that tie to the increase in incarceration for this population. Michigan continues its efforts to reach out to individuals with mental illness in order to divert incarceration. For example, the Mental Health Diversion Council has 11 pilots in 10 counties. The goal of the pilots is to take lessons learned and use those lessons as a roadmap to assist other counties statewide...this with the notion that once every county has a robust diversion initiative that addresses every point of intercept along the Sequential Intercept Model. This is a huge challenge with huge implications being played out on a huge stage evidenced by leadership at the highest levels trying to get a handle on it. The Department is committed to continue addressing this issue knowing that the gravity of what needs to be done would affect tens of thousands of Michiganders concerning mental health issues, SUD issues, homelessness and public safety.
15	Michigan notes SAMHSA's observation that the number of consumers who are homeless decreased 26% between the previous and current reporting year. Michigan is not yet aware, however, of any programmatic or data reporting reasons for this change. We will continue our review of this finding.
16	For this year the state was successful in determining the number of consumers who are receiving therapeutic foster care but do not have access to information on their age or gender.
16	Michigan notes SAMHSA's observation that the number of consumers receiving Multi-Systemic Therapy increased by 32% between the previous and current reporting year. Two additional teams have been added for a current total of twelve MST teams state-wide. Each team serves on average 20-30 families. Also over the last year, one of our mental health programs at Kalamazoo community mental health has increased the use of MST in joint partnership with the courts.
16	Michigan notes SAMHSA's observation that the number of consumers receiving Supported Housing services decreased by 51% between the previous and current reporting year. Michigan is not yet aware, however, of any programmatic or data reporting reasons for this change. We will continue our review of this finding.
16	Michigan notes SAMHSA's observation that the number of children with serious emotional disturbance (SED) increased 33% from the previous fiscal year. MDHHS staff are not aware of any clinical or programmatic reason for this increase. For FY18 and FY19, Michigan began using the clinical determination as reported in BH-TEDS. This is a new process from the previous approach of using the diagnoses on the encounter data as proxies for SED. Michigan provides regular training to the mental health programs on how to report the various BH-TEDS data elements. Michigan is sharing the information found by SAMHSA on the percentage increase in SED consumers to determine whether training is needed on how to report this data element.

URS Table Number	General Notes
17	As of September, 2019 when we did a count of the number of active Family Psychoeducation (FPE) Teams in the state, we had about 50. FPE continues to be utilized across the state, however, many teams have been/are currently dormant due to the other strains on their systems, budget constraints, FPE not being identified as a priority practice, or staff turnover. Widespread implementation and ongoing use has historically been problematic, especially in rural areas. Particularly with staff turnover, it has been difficult for providers to commit resources to developing FPE when other support services can be provided/offered to families. There are 15 active supervisors/trainers spread regionally across the state to provide regular supervision, and we continue to support the development of FPE by offering needed trainings and certification.
20A	Starting the current year, Michigan is using admission, discharge, and state hospital census information collected through the AVATAR system which is the Electronic Medical System for Michigan's State inpatient hospitals.
20B	Michigan collects admission, discharge and state hospital census information through the AVATAR system which includes the Electronic Medical System for Michigan's forensic State inpatient Hospital.
General Note	General Note on switch to AVATAR system for state inpatient data: starting this current reporting year Michigan can provide complete information on state inpatient census counts, admissions during the year, and discharges. Demographic information includes age, gender, race (white, Black/African American, Other) and Hispanic Origin (Puerto Rican, Mexican). Prior to 2017 Michigan obtained state inpatient information from the encounter data. Due to a 2016 change in the funding structure for state inpatient services, the quality and completeness of the state inpatient information in the encounter data declined. Given this, Michigan has switched the data source for state inpatient to the information collected via the AVATAR system.
