**Note:**

**Are Client Counts Unduplicated?** Unduplicated **Number of States with Unduplicated Counts** 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2018

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**

**Table 2a**

Age None  
 Gender None  
 Race None  
 Overall Includes Medicaid-eligible and grant-funded clients whose mental health services were paid with public funds.

**Table 2b**

Age None  
 Gender None  
 Race None  
 Overall None

**Note:**

US totals are based on states reporting.

This table uses data from URS Table 3.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

Age PRTFs serve clients <age 18; 12 females and 10 males included in 0-17 age group had turned 18 by 12/31.

Gender None

**Note:**

US totals are based on states reporting.

This table uses data from URS Table 16.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

Montana served an additional 48 clients younger than 18 on 12/31/2018 who were not included in this table, but were included in the MH-CLD. Supported Employment is considered an EBP in FY19 because the SMHA is doing their own fidelity checks.

**Notes:**

This table uses data from URS/DIG Table 19a.

US totals are based on states reporting.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients Served) data.

**State Notes:**

Includes all adults and children whose mental health services were funded through the SMHA.

**OUTCOMES DOMAIN: CRIMINAL JUSTICE: ARRESTS OVER THE LAST 2 YEARS BY GENDER, FY 2019**

**Note:**

US totals are based on states reporting.  
 This table uses data from URS Table 19b.  
 US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

None

**Outcomes Domain: Change in Social Connectedness and Functioning, FY 2019**

**Montana**

**Reporting Period: 7/1/2018 To: 6/30/2019**

Indicators	Children				Adults			
	State	US Average	US Median	States Reporting	State	US Average	US Median	States Reporting
Percent Reporting Improved Social Connectedness from Services	83.4%	87.6%	84.4%	45	66.8%	75.8%	72.8%	51
Percent Reporting Improved Functioning from Services	66.8%	72.4%	66.8%	44	65.4%	76.0%	73.1%	51

**Note:**

This table uses data from URS Table 9.

US State Averages and Medians are calculated only with states which used the recommended Social Connectedness and Functioning questions.

Adult Social Connectedness and Functioning Measures	State	US
Did you use the recommended new Social Connectedness Questions?	Yes	49
Did you use the recommended new Functioning Domain Questions?	Yes	49
Did you collect these as part of your MHSIP Adult Consumer Survey?	Yes	47

Children/Family Social Connectedness and Functioning Measures	State	US
Did you use the recommended new Social Connectedness Questions?	Yes	46
Did you use the recommended new Functioning Domain Questions?	Yes	45
Did you collect these as part of your YSS-F Survey?	Yes	44

Forensics included in Table?

No

State Hospitals included in Table?

Yes

**Note:**

US totals are based on states reporting.

This table uses data from URS Table 21.

State Notes:

For Table 21 only, per URS instructions, client's admission status (forensic v civil) was based on the status of the last discharge in the FY.

Montana

URS Table Number	General Notes
4	The decrease in the number of consumers employed, unemployed and not in the labor force is due to not receiving as much employment data from our providers as we have historically, which we are working on addressing.
5A & 5B	The increase in the number of consumers with Non-Medicaid funding and a combination of both Medicaid and non-Medicaid funding is due to an improvement in client-level data collection, particularly among our grant-funded clients.
6	The decrease in percent of consumers served in Community Programs at the beginning of the year pertained to adults and was due to a temporary reduction in adult case management staff in FY18, and in consistently using the >90-day-without-a-paid-claim administrative rule to determine if a client was on the books at the beginning of the year, rather than using a combination of provider data and the 90-day rule.
6	Decrease in state hospital LOS in FY19 is due to two discharged clients from FY18 with exceptionally long stays (a forensic commitment for 40 yrs. and a civil commitment for 11 yrs.). Recalculating FY18 stays after removing those two outliers resulted in an average FY18 LOS of 104 (identical to the FY19 LOS).
6	The increase in number of consumers served in other psych inpatient settings at the beginning of the year is due to a small n, where the percent of the FY19 population served in other psych inpatient settings at the beginning of the year is the same as it was for FY18 (.001).
6	The decrease in the number of consumers served in a residential treatment center at the beginning of FY19 compared to FY18 is because FY18 included adults in the MT Mental Health Nursing Care Center and FY19 did not. When comparing only youth in PRTFs, the percent of the population being served at the beginning of the year in a PRTF is nearly identical for FY19 vs. FY18 (.0024).
7	Total MHBG expenditures dropped by 24% between FY18 and FY19 due to significant funds being allocated for Peer services. Peer services then became a Medicaid covered service through legislative intent which prevented the MHBG funds being spent towards Peer services.
7	Medicaid expenditures related to 24-hour and non-24-hour care under the Adult Mental Health Medicaid Program were inadvertently not included in FY18, but were included in FY19 along with clear documentation going forward for completing Medicaid expenditures on Table 7.
7	Other Federal Funds for Mental Health Services (which includes federal expenditures related to the PATH homelessness grant) were inadvertently not included in FY18, but were included in FY19 along with clear documentation going forward for completing Other Federal Funds expenditures on Table 7.
7	In FY18, locally funded expenditures incorrectly mirrored state funded expenditures. The FY19 URS Tables corrected this error and generated clear documentation going forward, to clarify that Montana has no locally funded State Hospital expenditures.
7	In FY18, State Hospital locally funded expenditures incorrectly mirrored state funded expenditures. The FY19 URS Tables corrected this error and generated clear documentation going forward, to clarify that Montana has no locally funded Mental Health Services expenditures.
7	Medicaid mental health service expenditures for ambulatory/community Non-24-hour care were inaccurately documented on the FY18 URS Tables, but have been included correctly in FY19 along with clear documentation going forward for completing ambulatory/community non-24 hour care expenditures on Table 7.
7	The grand total mental health expenditures for Montana increased in FY19 primarily due to the inclusion of Medicaid expenditures related to 24-hour and non-24-hour care under the Adult Mental Health Medicaid program.
7 & 7A	Montana allocated 13% of the total MHBG award to FEP in both FY18 and FY19. Because the total MHBG award was more in FY19 than in FY18, the amount allocated to the FEP contract was more.
12	Nicotine-related diagnoses were excluded when calculating percent with "Substance Use Problem" in Table 12. When nicotine-related diagnoses are included, the % of those with a co-occurring disorder increases to 43% for Adults and 6% for Youth. For the BCI, adult clients who had a "Substance Use Problem" included not only those with a documented SUD dx, but also clients indicating a substance use disorder (including tobacco) obtained from data through Recovery Markers, 72-hr program, County & Tribal Matching Grants, First Episode Psychosis, and the MHSIP Survey without a specific SUD diagnosis documented in paid claims. Nicotine-related diagnoses (F17 dx series) were only listed in the BCI if there were no non-Nicotine SUD diagnoses.
12	The 1% increase in SUD among youth in FY19 vs FY18 can be attributed to improved data collection methods. There was also a 1% increase in active tobacco product use (including vaping) among youth.

URS Table Number	General Notes
14A & 14B	The increase in the number and percent of consumers that qualify as SED is primarily due to applying more comprehensive criteria for youth in FY19 (such as >10 MH outpatient sessions and >20 CSCT units) in addition to diagnosis. The increase in the percent of adult consumers with SDMI was based on using more comprehensive criteria (such as having received specific services) in addition to diagnosis to qualify for SDMI.
15	The reduction of those whose last living situation was jail compared to FY18 is likely due to efforts to divert mentally ill clients from jail (through the 14-day Diversion Program), improving crisis intervention treatment (through crisis houses, crisis response teams, the 72-hr crisis intervention program and County & Tribal Matching Grants program), and continued Crisis Intervention Training of law enforcement and first responders.
15A	Not included in this table because they did not meet current SED/SDMI definitions were 118 additional adults served in MSH; 25,354 additional clients served in outpatient settings; and 359 additional adults served in Other Psychiatric Inpatient settings. Additional functional requirements used to define SED/SDMI were not used in determining SED/SDMI on the URS/BCI because functional assessment data is not available in the paid claims database.
16	A new PACT team started up in FY19, resulting in an increase in consumers receiving ACT services. Please see General Note for Tables 14A & 14B regarding the increase in SED/SDMI.
17	The increase in the number of consumers receiving IMR is due to the increase in consumers served in FY19. The percent of clients receiving IMR remained the same in FY19 as in FY18 (.004).
20B	Percentage changes in 30-day and 180-day readmission to MSH is not significant due to very small numbers.
