

Nevada 2019 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,131,606	6.24	24.81	58
Community Utilization per 1,000 population	7,826,684	6.22	23.88	58
State Hospital Utilization per 1,000 population	132,710	0.87	0.41	54
Other Psychiatric Inpatient Utilization per 1,000 population	409,098	-	1.45	39

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	764,240	32.6%	46.7%	57
Employed (percent with Employment Data)**	764,240	15.6%	21.7%	57

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	68.8%	75.4%	52

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	91.8%	71.9%	46

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	6,218	12.1%	7.8%	50
State Hospital Readmissions: 180 Days	14,246	28.6%	17.8%	53
State Hospital Readmissions: 30 Days: Adults	5,733	11.3%	8.0%	49
State Hospital Readmissions: 180 Days: Adults	13,057	27.9%	18.1%	53
State Hospital Readmissions: 30 Days: Children	485	48.1%	6.0%	18
State Hospital Readmissions: 180 Days: Children	1,187	63.0%	14.7%	19

Living Situation	U.S.	State	U.S. Rate	States
Private Residence	4,133,022	47.3%	83.7%	56
Homeless/Shelter	222,985	18.3%	4.5%	51
Jail/Correctional Facility	113,677	6.4%	2.3%	51

Adult EBP Services	U.S.	State	U.S. Rate	States
Supported Housing	97,515	14.3%	3.1%	32
Supported Employment	72,250	-	2.0%	42
Assertive Community Treatment	72,957	1.2%	1.9%	43
Family Psychoeducation	39,074	-	2.5%	16
Dual Diagnosis Treatment	234,329	17.7%	10.4%	26
Illness Self Management	317,463	-	18.9%	20
Medications Management	547,936	65.8%	31.3%	20

Child/Adolescent EBP Services	U.S.	State	U.S. Rate	States
Therapeutic Foster Care	5,390	-	0.7%	22
Multisystemic Therapy	33,517	-	4.2%	19
Functional Family Therapy	35,054	-	5.9%	15

Change in Social Connectedness	State	U.S. Rate	States
Adult Improved Social Connectedness	71.6%	75.8%	51
Child/Family Improved Social Connectedness	86.6%	87.6%	45

*Denominator is the sum of consumers employed and unemployed.

**Denominator is the sum of consumers employed, unemployed, and not in labor force.

Note:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2018

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age Age calculated at midpoint of reporting period
 Gender None
 Race Race not available includes 'some other race alone' (n=1,410)

Note:

US totals are based on states reporting.

This table uses data from URS Table 16.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

The numbers of people have declined as the fair market rates have increased for rent and utilities. In addition, the State is the safety net so the persons served require more intensive supportive services in the community.

What populations are reported? All Clients Number of States Reporting All Clients: 46 Number of States Reporting Some Clients: 10

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
NV	Yes	Yes	-	-	-
US	43	30	3	7	26

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

Age Age calculated at midpoint of reporting period
 Gender None
 Overall Populated by NRI using Nevada's 2098 MH CLD-BCI dataset

URS Table Number	General Notes
6	<p>During the last year, Rawson-Neal state psychiatric hospital was able to have an in-house family services specialist from Medicaid whose main responsibility is to check patient insurance information/status and benefits, and apply them for insurance if they did not have any. It is for this reason that the admission rate to state psychiatric hospitals during the year has decreased. Many of our patients had medical insurance when they were discharged, and can now utilize other psychiatric facilities other than Rawson-Neal. Rawson-Neal Inpatient LOS increased in 2019 due to several factors which were (1) multiple patients needing residential services assistance, these patients had no medical insurance and financial benefits. (2) patients that were undocumented, and unable to discharge to shelter. (3) patients who had medical insurance/financial benefits but need a locked facility due to symptom severity/low functional status, or rejected by licensed state residential facilities due to history of aggression/violence.</p>
7, 7A	<p>The Total MHBG Expenditures increased by 62% from 2018 to 2019 due to the State of Nevada's success in executing contractual documents to the Bureau's subrecipients and ensuring that proper spending was occurring. The State implemented a internal MHBG team comprised of an array of professionals that tracked and monitored these expenditures to ensure that the State of Nevada spends a majority of the MHBG in 2019. Data on these tables represent the State of Nevada's commitment to providing this specific population with the much-needed services that the MHBG authorizes. The Primary Prevention increase is due to costs associates for our Health Program Manager to attend a conference and do a site visit to our Southern facilities. Due to the changes in Medicaid and the increases in services covered by Medicaid, there was an increase to the total Medicaid expenditures.</p>
12	<p>At the time that the State was preparing our December 2018 URS data, we discovered that even though diagnostic evaluations and determinations for serious mental illness (SMI) were being performed and entered into the EHR at intake, subsequent determinations were not being entered into the EHR unless there was a change in a client's SMI status. Moreover, since the data capture that was being used did not recognize SMI status entries that were earlier than the preceding two years (i.e., going back more than two years), many statuses were termed as Unknown. Thus, the estimated number of adults meeting the Federal definition of SMI for that reporting period (2018) was likely underestimated. Following the above systems analysis, the IT Services Staff (Division of Public and Behavioral Health) presented the results to the next EHR Committee Meeting with Clinical Services Managers and Supervisors. The goal was to develop a corrective action plan to achieve full compliance with State Medicaid policy requiring that SMI determinations be performed annually. The 37% increase in SMI diagnoses likely reflects the results of subsequent efforts toward compliance with assessment policy and reliable EHR documentation.</p>
14A	<p>NAC 433.040 "Adult with a serious mental illness" and "child with a serious emotional disturbance" defined for counting purposes. (NRS 433.324). Each division facility shall use the following definitions to count the number of persons in this state who are adults with a serious mental illness or children with a serious emotional disturbance: 1. "Adult with a serious mental illness" means a person who is at least 18 years old and has been diagnosed within the immediately preceding 12 months as having a mental, behavioral or emotional disorder as defined in the "Diagnostic and Statistical Manual of Mental Disorders," as adopted by reference in NAC 433.050, other than an addictive disorder, mental retardation, irreversible dementia or a disorder caused by an abuse of alcohol or drugs, which interferes with or limits one or more major life activities of the adult. 2. "Child with a serious emotional disturbance" means a person who is less than 18 years old and has been diagnosed within the immediately preceding 12 months as having a mental, behavioral or emotional disorder as defined in the "Diagnostic and Statistical Manual of Mental Disorders," as adopted by reference in NAC 433.050, other than a mental disorder designated as a Code V disorder in the Manual, a developmental disorder or a disorder caused by an abuse of alcohol or drugs, which substantially interferes with or limits the child from developing social, behavioral, cognitive, communicative or adaptive skills or his activities relating to family, school or community. The term does not include a child with a disorder which is temporary or is an expected response to stressful events. (Added to NAC by Common on Men. Health & Men. Retardation, eff. 8-24-88; A 11-19-90; R128-97, 11-14-97).</p>
14A	<p>NRS 433B.045 "Child with an emotional disturbance" defined: "Child with an emotional disturbance" means a child whose progressive development of personality is interfered with or arrested by mental disorder so that he shows impairment in the capacity expected of him for his age and endowment for: 1. A reasonably accurate perception of the world around him; 2. Control of his impulses; 3. Satisfying and satisfactory relationships with others; 4. Learning; or 5. Any combination of these factors. (Added to NRS by 1993, 2708)— (Substituted in revision for NRS 433B.080).</p>

URS Table Number	General Notes
14A	<p>402.36 Severe Emotional Disturbance (SED): 1. Persons from birth through 48 months who currently or at any time during the past year (continuous 12-month period) have a: a). DC:0-3 Axis I diagnostic category in place of a DSM Axis I diagnostic category; or b). DC:0-3 Axis II PIR-GAS score of 40 or less (the label for a PIR-GAS score of 40 is "Disturbed"); or 2. Persons from 4 to age 18 who currently or at any time during the past year (continuous 12-month period) have a: a). Diagnosable mental or behavioral disorder or diagnostic criteria that meets the coding and definition criteria specified in the DSM (excluding substance abuse or addictive disorders, irreversible dementias, mental retardation, developmental disorders, and V codes, unless they co-occur with a serious mental disorder that meets DSM criteria); and have a: b). Functional impairment which substantially interferes with or limits the child from achieving or maintaining one or more developmentally appropriate social, behavioral, cognitive, communicative or adaptive skill. Functional impairments of episodic, recurrent, and persistent features are included, however may vary in term of severity and disabling effects unless they are temporary and an expected response to stressful events in the environment. Children who would have met functional impairment criteria during the referenced year without the benefit of treatment or other support services are included in this definition.3. SED determinations are made by a Qualified Mental Health Professional (QMHP) within the scope of their practice under state law and expertise. Regarding the increase in clients with co-occurring MH and SUD: Better screening and documentation of individuals with co-occurring disorders.</p>
15	<p>We had increased discharges to shelter in the last year due to the following: (1) Limited to no housing benefits for patients approved for outpatient case management, and (2) Increased admission of patients in the last year who do not have any finances to support housing need, or had been homeless prior to admission. The increase in the total number of consumers in Jail/Correctional Facility is due to properly classifying clients in our forensic programs. In previous years, staff had chosen "Unknown" when in fact, these clients were returned to custody after their competence to stand trial was restored. Also, the discharge living arrangement is not a required field and wasn't consistently populated in 2019. We are going to work with the vendor of our electronic health record to see if we can make it a required field going forward.</p>
16	<p>Sometime in FY 2018, we went to providing PACT Services only in the Southern region resulting in a decrease in the total number of adults receiving ACT services.</p>
17	<p>The decrease in the total number of adults receiving integrated dual diagnosis services is a result of reduction in contract due to reduction in funding (it used to be HUD grant funded and now it is general fund). Regarding increase in medication management: Due to ACA, individuals with insurance are connected to the community for behavioral health outpatient services. SNAMHS is the safety net for individuals that are uninsured, under-insured, or uninsurable.</p>
