**Are Client Counts Unduplicated?** Unduplicated **Number of States with Unduplicated Counts** 43  
 Duplicated between children and adults

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2018

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**

**Table 2a**

Age Age calculated at midpoint of reporting period  
 Gender None  
 Race Race 'not available' includes clients that identified as 'other race' (N=2,354)  
 Overall Populated by NRI using Ohio's 2019 MH CLD-BCI dataset

**Table 2b**

Age Age calculated at midpoint of reporting period  
 Gender None  
 Race None  
 Overall Populated by NRI using Ohio's 2019 CLD-BCI dataset

**Note:**

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

**Table 3 State Notes:**

Age Age calculated at midpoint of reporting period  
 Overall Populated by NRI using Ohio's 2019 CLD-BCI dataset  
 Gender None

**Table 6 State Notes:**

Hospital None

**Note:**

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

**Table 6 State Notes:**

Hospital	None
Other Inpatient	None
Residential	Variance between 2018 and 2019 is due to the low number of cases. Only 1 client discharged in 2019 compared to more in 2018.
Community	None
Overall	None

**Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2019**

**Ohio**

**Reporting Period: 7/1/2018 To: 6/30/2019**

<b>Adults and Children who meet the Federal Definition of SMI/SED</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who meet the Federal definition for SMI	100.0%	71.4%	73.0%	56
Percent of Children served through the SMHA who meet the Federal definition for SED	100.0%	70.8%	75.0%	55

<b>Co-occurring MH and Substance Abuse Consumers</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	25.9%	27.6%	25.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	3.3%	7.2%	3.0%	54
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	26.1%	27.9%	25.0%	55
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	5.5%	8.6%	4.0%	53

**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

Ohio does not use federal SMI & SED definitions and has more restrictive definitions. Children's residential data belongs to Child Welfare.

**State Notes**

None

Ohio

URS Table Number	General Notes
4	The 19% increase in employment from FY18 to FY19 can be explained by an increase in data collected around employment as well as an increased IPS supported employment programming by the state.
5A	Can not speculate at this time on Medicaid claims data changes. There were differences in the way the BCI file was constructed than in the past. Table 5A (Medicaid claims) and Table 6 (Community Involvement) were drawn from BCI data file. We are not aware of any particular reason for the increase from the two years. Difference in construction method in the BCI file construction may explain them since a new contractor is involved in heading this task this year.
6	Other psychiatric setting data was extracted from QDSS inpatient Medicaid claims and there are no programatic changes that may account for the increase in the total number of clients served in other psychiatric inpatient settings from 2018 to 2019. The data source for residential treatment centers changed from child welfare placement data extract used in previous URS to reporting from BCI data file. This change of data source and its focus may explain increase in the total number of clients served in residential treatment centers.
7	Ohio's total MHBG award increased by approximately \$3 million from 2018 to 2019, which accounts for the 18% increase in total MHBG expenditures and 16% increase in ESMI set-aside. The 36% increase in primary prevention expenditures and 77% percent increase in total EBP for ESMI expenditures can be accounted by an increase in state budget funds specifically in those areas, along with the increased MHBG allotment.
7A	Ohio's total MHBG award increased by approximately \$3 million from 2018 to 2019, which accounts for the 19% increase ESMI set-aside, along with an increase in Medicaid funding.
14A	Our criteria/algorithm for classifying SMI/SED became less restrictive than in previous years. We also were able to collect more complete data on diagnosis codes which would classify more consumers as SMI/SED.
15	Ability to collect data on client demographics was expanded, resulting in more consumers reporting privately housed.
16	Our criteria/algorithm for classifying SMI/SED became less restrictive than in previous years. We also were able to collect more complete data on diagnosis codes which would classify more consumers as SMI/SED.
17	This is the data our contracted fidelity monitor provided us. It is possible they were unable to secure complete data from our IDDT providers.
20B	Small N cause for large percentage change from year to year.
