Note:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2018

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age Age calculated at midpoint of reporting period
 Gender None
 Race None
 Overall Populated by NRI using Rhode Island's 2019 MH CLD-BCI dataset. See General Notes

Table 2b

Age Age calculated at midpoint of reporting period
 Gender None
 Race None
 Overall Populated by NRI using Rhode Island's 2019 MH CLD-BCI dataset. See General Notes

Note:

This table uses data from URS Tables 2a, 2b, 14a, and 14b.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State used Federal SMI Definition? No
 Use client's DSM IV diagnosis code only
 Diagnoses included in State SMI definition 295-298.99
 State used Federal SED Definition? No
 Use client's DSM IV diagnosis only
 Diagnoses included in State SED definition 295-298.99 and 314

State Notes:

Table 14a

Age Age calculated at midpoint of reporting period
 Gender None
 Race None
 Overall Populated by NRI using Rhode Island's 2019 MH CLD-BCI dataset. See General Notes

Table 14b

Age Age calculated at midpoint of reporting period
 Gender None
 Race None
 Overall Populated by NRI using Rhode Island's 2019 MH CLD-BCI dataset. See General Notes

What populations are reported?

Number of States Reporting All Clients: 46 Number of States Reporting Some Clients: 10

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
RI	Yes	Yes	-	-	Semi-annual
US	43	30	3	7	26

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

- Age Age calculated at midpoint of reporting period
- Gender None
- Overall Populated by NRI using Rhode Island's 2019 MH CLD-BCI dataset.

Notes:

This table uses data from URS/DIG Table 19a.

US totals are based on states reporting.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients Served) data.

State Notes:

Data represent all intakes into the adult correctional facility (ACI), which includes most, but not all arrests in RI. Some arrestees are immediately released or held overnight locally. An intake also might represent a sentencing to time in the ACI.

Notes:

This table uses data from URS Table 19a.

US totals are based on states reporting.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients Served) data.

State Notes:

Data represent all intakes into the adult correctional facility (ACI), which includes most, but not all arrests in RI. Some arrestees are immediately released or held overnight locally. An intake also might represent a sentencing to time in the ACI.

URS Table Number	General Notes
4	It is unclear what contributes to the increase in the number of clients that were unemployed. We ran the numbers to ensure that there were not any outliers in terms of providers, and across the board, all providers reported an increase in unemployment from 2018 to 2019.
7	We experienced a decline in some contracts and payments in 2018 and activities resumed to normal in 2019 which explains the increase in MHBG expenditures from 2018 to 2019. We restructured our organization and many of our staff are centralized and no longer receive the same funds which resulted in a decrease in total state expenditures from 2018 to 2019. We secured new grants which explain the increase in total other expenditures from 2019 to 2019.
12	Some variance between 2018 and 2019 in the percent of children served by the SMHA with co-occurring MH/SA diagnosis may be attributed to the transition from ICD-9 to ICD-10.
14A	The increase in the number of clients with SMI/SED is definitely an issue with our diagnoses not coming over correctly in our system transition. Our old system was ICD-9 and our transition to our new system and ICD-10 was imperfect. The 2019 numbers are likely a much more accurate representation of the population.
15	Unclear why homelessness increased from 2018 to 2019. No providers appear to be major outliers with reporting homelessness.
