Note:

Are Client Counts Unduplicated? Duplicated between Hospitals and Community **Number of States with Unduplicated Counts** 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2018

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age is determined at midpoint of reporting year.
 Gender None
 Race TennCare includes Native Hawaiian or Other Pacific Islander in the Asian race category and does not collect multi-race data. The number of individuals with unknown race reported by TennCare decreased in FY2019, resulting in increases across race groups.
 Overall Data includes: TennCare (Medicaid); TDMHSAS Behavioral Health Safety Net; non-Medicaid crisis; state psychiatric hospitals; and private psychiatric hospitals that contract with TDMHSAS. See General Notes for more information.

Table 2b

Age None
 Gender None
 Race None
 Overall Ethnicity is not collected and therefore, not reported.

Note:

This table uses data from URS tables 5a and 5b.

Type of Medicaid Data Reported

Data based on Medicaid Paid Services

State Notes

- 5a Age TennCare includes Native Hawaiian or Other Pacific Islander in the Asian race category and does not collect multi-race data. While TennCare no longer requires providers to report race, the number of individuals with unknown race decreased in FY2019.
- 5a Gender None
- 5a Overall TennCare (Medicaid); TDMHSAS Behavioral Health Safety Net (non-Medicaid); Crisis (Medicaid and/or non-Medicaid); state psychiatric hospitals (Medicaid and/or non-Medicaid); and contracted private psychiatric hospitals (non-Medicaid). See General Notes.
- 5b Overall Ethnicity is not collected and therefore, not reported.

Note:

This table uses data from URS Tables 2a, 2b, 14a, and 14b.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State used Federal SMI Definition? Yes
 TennCare includes certain ICD-9 mental health diagnoses (mapped to ICD-10 diagnoses), a 15-month claim and age 18+ years to categorize individuals as having SMI.

Diagnoses included in State SMI definition Some ICD-10 diagnoses that were previously classified as ICD-9 priority diagnoses (ranging from 290.xx - 314.xx).

State used Federal SED Definition? Yes
 TennCare includes certain ICD-9 mental health diagnoses (mapped to ICD-10 diagnoses), a 15-month claim and age 0-17 years to categorize individuals as having SED.

Diagnoses included in State SED definition Some ICD-10 diagnoses that were previously classified as ICD-9 priority diagnoses (ranging from 290.xx - 314.xx).

State Notes:

Note:

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

Table 6 State Notes:

- Hospital Age calculated as age at midpoint fiscal year; TN does not provide state psychiatric hospital beds for children, ages 0-17. Concentrated efforts to discharge patients with extended stays at RMHIs resulted in an increase in the overall length of stay.
- Other Inpatient Data include TennCare (Medicaid).
- Residential Data include TennCare (Medicaid).
- Community Data include TennCare (Medicaid).
- Overall Hospital and Community data: age determined at midpoint of the reporting year. See General Notes.

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2019

Tennessee

Reporting Period: 7/1/2018 To: 6/30/2019

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	84.8%	71.4%	73.0%	56
Percent of Children served through the SMHA who meet the Federal definition for SED	83.9%	70.8%	75.0%	55

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	28.5%	27.6%	25.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	2.6%	7.2%	3.0%	54
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	17.2%	27.9%	25.0%	55
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	1.8%	8.6%	4.0%	53

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

TennCare reports the count of SMI/SED and SUD who receive a behavioral health service. SMI & SUD)/SMI=29,332/170,808=17.2%; (SED & SUD)/SED=1,977/109,381=1.8%]. TennCare employs an operational definition based on diagnosis and a 15-month claims history to categorize individuals as having a serious mental illness (SMI). Substance abuse disorders (SUD) based on the presence of a secondary diagnosis of a substance use disorder (ICD-10 section F10-F19: Disorders due to psychoactive substance use).

State Notes

TN does not provide state psychiatric hospital services to those aged 17 and under. The forensic population is served in the state hospital population.

1. Do you monitor fidelity for EBP? No
2. IF YES what fidelity measure is used? -
3. Who conducts fidelity measure? -
4. How often is fidelity measured? -
5. Is the SAMHSA EBP Toolkit used to guide EBP Implementation? No
6. Have staff been specifically trained to implement the EBP? No

States Measuring Fidelity= 8

SAMHSA Toolkit Used= 9
EBP Training= 9

Note:

US totals are based on states reporting.

This table uses data from URS Table 16.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

A computer system transition in FY2019 by a large provider resulted in improvements in identifying duplicated clients. Additionally, a switch by a few providers to EBPs not found on the URS report caused a slight decrease to select FY2019 counts.

1. Do you monitor fidelity for EBP? No
2. IF YES what fidelity measure is used? -
3. Who conducts fidelity measure? -
4. How often is fidelity measured? -
5. Is the SAMHSA EBP Toolkit used to guide EBP Implementation? No
6. Have staff been specifically trained to implement the EBP? Yes

States Measuring Fidelity= 5

SAMHSA Toolkit Used= 6
EBP Training= 10

Note:

US totals are based on states reporting.

This table uses data from URS Tables 16 and 17.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

A computer system transition in FY2019 by a large provider resulted in improvements in identifying duplicated clients. Additionally, a switch by a few providers to EBP's not found on the URS report caused a slight decrease to select FY2019 counts.

Tennessee

URS Table Number	General Notes
2A, 5A, 14A and 21	TennCare includes Native Hawaiian or Other Pacific Islander in the Asian race category and does not collect multi-race data. While TennCare no longer requires providers to report race, the number of individuals with unknown race decreased in FY2019. This resulted in reported increases across all race groups, especially African American and White.
2B, 5B, 14B	Ethnicity is not collected, therefore, this information is not reported.
3 and 15A	A person who was served in both a community setting and inpatient setting was included in both rows. "Other psychiatric inpatient" includes psychiatric inpatient services provided to TennCare (Medicaid) enrollees and to indigent patients through private psychiatric hospitals under contract with the TDMHSAS.
4 and 14	Employment and residential status updates are obtained after 6-months but before 7 months of last survey administered for TN's Community Survey System. For TN's Crisis Services System, updates are collected if there is more than one face-to-face encounter over the course of the reporting period.
4 and 15	One of the largest providers submitted fewer completed surveys in FY2019 than in FY2018. This resulted in a significant overall decrease in responses.
5A	In FY2019 the ability to determine funding status across multiple data systems improved. This improvement impacted counts across funding categories. This new methodology was retrospectively applied to FY2017 and FY2018 URS tables and FY2017 and FY2018 URS table were resubmitted to reflect this change and allow for consistent comparisons across FY 2017-FY 2019.
5A	TennCare (Medicaid) data is provided at the aggregate level, not client level. This does not allow for the de-duplication of clients across TennCare and TDMHSAS systems. It is possible for people counted under TennCare to also be counted under TDMHSAS data systems. Clients receiving care at state hospitals may become eligible for TennCare (Medicaid) services during their stay, resulting in a reimbursement of TDMHSAS dollars.
6	The number of unduplicated clients served by TennCare (Medicaid providers) at Residential Treatment Centers was higher at the beginning of FY2019 (n=671) compared to the beginning of FY2018 (n=590). Similarly, the total number of unduplicated clients served in FY 2019 (n=5,615) was higher than the total number of unduplicated clients served in FY 2018 (n=4,529). This is in part due to an increase in the number of clients with SA and SED/SMI co-occurring diagnoses in need of residential treatment.
7	There was an overall increase in FY2019 MHBG funding compared to FY2018. However, between FY2018 and FY2019, there was a slight reduction in Medicaid and Medicare patients at the state Regional Mental Health Institutes and a reduction in community-based care funded by discretionary federal grants that were phased out.
7A	In 2019 year, the First Episode Psychosis was expanded to two ways that contributed to the change in expenses: 1) a new provider was added to cover an additional county of the state; and 2) a new contract was established to employ a statewide trainer to provide training, technical assistance, and fidelity monitoring to Coordinated Specialty Care/OnTrackTN teams across the state.
8	FY2019 Quality assurance and improvement funds included FY2018 supplemental T/A funds spent in FY2019. Revised definitions for Infrastructure Support, Quality assurance and improvement, and Training and Education resulted in changes to FY2018 information previously reported. Using the same definitions as those used in FY2019, \$0 was spent in FY2018 for Infrastructure Support (previously reported as \$191,500) and \$239,999 was spent in FY2018 for quality assurance and improvement (previously reported as \$0).
10	In the Federal Fiscal Year 2018 appropriation, Congress increased the funding for the federal Community Mental Health Block Grant (MHBG). After soliciting input from Tennessee's Planning and Policy Council Executive Committee, leadership from community behavioral health centers, consumers, family organizations, and other key stakeholders, the Department released following funding announcements (i.e. Announcements of Funding/AOF) in FY2019 as a result of this increase: Intensive Long Term Support; School Based Behavioral Health Liaisons; First Episode Psychosis; Tennessee Move Initiative; and the Older Adults Program. Announcements for these programs have all been released and many proposals are under review at the time of this report submission. Additionally, these new funds are supporting the enhancement of the Recovery Within Reach/Housing Within Reach website, creation of an Anti-Stigma Campaign related to mental illness and crisis services, and increasing resources for targeted transitional support services. Peer support and supported employment services will also be enhanced as a result of these funds.
12	This table only include TennCare (Medicaid) data.

URS Table Number	General Notes
12,14A & 15A	TennCare employs an operational definition of SMI/SED based on ICD10 behavioral health diagnosis and a 15-month claims history to categorize individuals as having serious mental illness (SMI/SED). Substance abuse disorders (SUD) were based on the presence of a primary or secondary diagnosis of substance abuse disorder (ICD-10 section F10-F19: Disorders due to psychoactive substance use). Co-occurring diagnoses were based on a primary mental health diagnosis and a secondary substance use diagnosis.
14A & 15A	In March 2015, Crisis Services stopped collecting data on diagnoses. Data from TennCare (Medicaid); TDMHSAS Behavioral Health Safety Net; state psychiatric hospitals; and private psychiatric hospitals that contract with TDMHSAS, are included in these tables.
16 & 17	A computer system transition in FY2019 by a large provider resulted in improvements in identifying duplicated clients. Additionally, a switch by a few providers to EBPs not found on the URS report caused a slight decrease to select FY2019 counts.
20A	Efforts have been made to increase community support systems for people with mental illness, including the Tennessee Behavioral Health Safety Net. These supports encourage improved compliance with discharge treatment plans and in turn, reduce the potential for readmission.
21	This table only include TennCare (Medicaid) data. The large percentage increase for TennCare 180-day readmission rates in FY2018 (36%, 6,766) compared to FY2017 (29.18%, 5411) was due to a change in methods. When estimating this metric for FY2017, only claims incurred in FY2017 were considered, which is incorrect. Any claims prior to (July 1, 2016) associated with readmissions in FY2017 should have been considered. Using this correct method, the TennCare readmission rate for FY2017 should have been 34.5% which is similar to the FY2018 180-day readmission rate.
