URS Table Number	General Notes
All tables with client level data excluding hospitals	When comparing Table 5A for 2019 to Table 5A for 2018 it is evident that the decrease in the reporting of the number served is due to individuals with Non-Medicaid sources. It is likely providers are unwilling to provide the assessment specified for reporting purposes as these assessment are not reimbursed by any third party payer.
2A, 5A, 14A	WV has a "race other" option which is added to Race Not Available. Also, Individuals can select multiple race categories. The race categories selected by that person may not be consistent. When this occurs the category "More Than One Race" is selected for reporting purposes.
3, 6	One of the State Psychiatric Hospitals lost their CMS Accreditation. As a result they only accepted forensic admissions.
6	Individuals under the age of 18 are not admitted to our institutions. Age is determined as of January 1, 2019. If a person's 18th birthdate is after this date their age will be calculated as if they were under 18 at the time of admission.
7	The increase in total MHBG expenditures is related to grantees awarded and expending more block grant dollars in FY2019. The other funds expenditures increased with new federal grants received by the bureau. Total administration expenditures increased due to additional staff being hired.
8	The grantee was able to expend additional funds in 2019 for the behavioral health planning and advisory council.
12, 16	WV is currently experiencing an expansion of where behavioral health services are provided. Historically comprehensive behavioral health centers have provided many of the direct services in the state as well as being the backbone of the state's behavioral health infrastructure. However, options are expanding in the state, this includes both out-patient for both mental health and behavioral health, and in-patient for SUD services. New providers are providing services to the SED population, funding for this transformation is occurring outside of BBH funds and are not subject to the reporting requirements of the Bureau.
14	The increase in Multi-racial appears to be linked to the decrease reporting of African Americans receiving services.
16A	Data on first episode psychosis are not collected.
20A, 20B, 21	The hospitals only collect and report on a single race category and do not collect ethnicity. However, WV uses a unique identifier which goes across community and hospital data. Race, as well as ethnicity, is pulled from the unique identifier which uses race and ethnicity reported to community providers in addition to race reported to the hospital. The number of people reported as More Than One Race is due to multiple races being selected across the providers or the selection of multiple race categories within a single provider by the person. The Hispanic/Latino origins for people admitted only to a hospital is not known only the Hispanic status is reported.
21	It appears that, due to one of the two state psychiatric hospitals losing accreditation during the year and not accepting civil commitments, the numbers of transfers to other units and locations decreased. In WV's data reporting system, these transfers show as a discharge and readmission exclusively affecting the 30 days readmission rate.
