* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

^a The difference between this estimate and the 2019 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

¹ The total row includes respondents with missing underage drinking information.

² Respondents with unknown responses were excluded from the respective analyses.

³ Respondents could indicate multiple locations for the most recent time they used alcohol; thus, these response categories are not mutually exclusive.

⁴ Respondents could specify other locations for "Some Other Place." The "other" locations listed are among the most common write-in responses. Invalid write-in responses were excluded from this analysis.
