Note:

Are Client Counts Unduplicated? Duplicated between Hospitals and Community **Number of States with Unduplicated Counts** 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2019

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age is determined at midpoint of reporting year.
 Gender None
 Race TennCare includes Native Hawaiian or Other Pacific Islander in the Asian race category and does not collect multi-race data. The number of individuals with unknown race reported by TennCare decreased in FY2020, resulting in increases across race groups.
 Overall Data includes: TennCare (Medicaid); TDMHSAS Behavioral Health Safety Net; non-Medicaid crisis; state psychiatric hospitals; and private psychiatric hospitals that contract with TDMHSAS. See General Notes for more information.

Table 2b

Age None
 Gender None
 Race None
 Overall Ethnicity is not collected and therefore, not reported.

Notes:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

- Age Hospital and Community data: age is determined at the midpoint of the reporting year.
- Gender None
- Overall TN does not provide state psychiatric beds for those ages 0-17. Data includes: TennCare (Medicaid); TDMHSAS Behavioral Health Safety Net; state psychiatric hospitals and contracted private psychiatric hospitals. See General Notes.

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2020

Tennessee

Reporting Period: 7/1/2019 To: 6/30/2020

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	85.0%	71.6%	77.0%	55
Percent of Children served through the SMHA who meet the Federal definition for SED	84.0%	71.1%	75.0%	55

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	28.0%	28.0%	25.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	2.3%	8.1%	3.0%	55
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	17.0%	27.4%	24.5%	54
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	1.6%	9.6%	3.0%	54

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

TennCare reports the count of SMI/SED and SUD who receive a behavioral health service. SMI & SUD)/SMI=29,748/250,192=11.9%; (SED & SUD)/SED=1,811/115,174=1.6%]. TennCare employs an operational definition based on diagnosis and a 15-month claims history to categorize individuals as having a serious mental illness (SMI). Substance abuse disorders (SUD) based on the presence of a secondary diagnosis of a substance use disorder (ICD-10 section F10-F19: Disorders due to psychoactive substance use).

State Notes

None

Type of Medicaid Data Reported

Data based on Medicaid Paid Services

State Notes

- 5a Race TennCare includes Native Hawaiian or Other Pacific Islander in the Asian race category and does not collect multi-race data. While TennCare no longer requires providers to report race, the number of individuals with unknown race decreased in FY2020.
- 5a Gender None
- 5a Overall TennCare (Medicaid); TDMHSAS Behavioral Health Safety Net (non-Medicaid); Crisis (Medicaid and/or non-Medicaid); state psychiatric hospitals (Medicaid and/or non-Medicaid); and contracted private psychiatric hospitals (non-Medicaid). See General Notes.
- 5b Overall Ethnicity is not collected and therefore, not reported.

APPROPRIATENESS DOMAIN: NUMBER OF ADMISSIONS DURING THE YEAR TO STATE HOSPITAL INPATIENT AND COMMUNITY-BASED PROGRAMS, FY 2020

	Age NA	-	-	29	26,764	22,850	5,727	-	4.67	16

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Table 3 State Notes:

Age: None
 Overall: TN does not provide state psychiatric hospital beds for children, ages 0-17. Data include: TennCare (Medicaid); TDMHSAS Behavioral Health Safety Net; non-Medicaid crisis; state and private psychiatric hospitals. See General Notes.
 Gender: None

Table 6 State Notes:

Hospital: Age calculated as age at midpoint fiscal year; TN does not provide state psychiatric hospital beds for children, ages 0-17. Concentrated efforts to discharge patients with extended stays at RMHIs resulted in an increase in the overall length of stay.
 Other Inpatient: Data include TennCare (Medicaid).
 Residential: Data include TennCare (Medicaid).
 Community: Data include TennCare (Medicaid).
 Overall: Hospital and Community data: age determined at midpoint of the reporting year. See General Notes.

Note: This table use data from URS Table 7a.

* Other Funds include Medicaid, Other Federal funds, local funds, and other funds from table 7a.

State Notes:

In 2019 year, the First Episode Psychosis was expanded to two ways that contributed to the change in expenses: 1) a new provider was added to cover an additional county of the state; and 2) a new contract was established to employ a statewide trainer to provide training, technical assistance, and fidelity monitoring to Coordinated Specialty Care/OnTrackTN teams across the state. "Total CSC-Evidence-Based Practices for First Episode Psychosis Expenditures" increased in FY2020 because of the addition of state funds (\$190,000).

General Notes FY 2020

Tennessee

URS Table Number	General Notes
2A, 5A, 14A and 21	TennCare includes Native Hawaiian or Other Pacific Islander in the Asian race category and does not collect multi-race data. While TennCare no longer requires providers to report race, the number of individuals with unknown race decreased in FY2020. This resulted in reported increases across all race groups.
2B, 5B, 14B	Ethnicity is not collected, therefore, this information is not reported.
3 and 15A	A person who was served in both a community setting and inpatient setting was included in both rows. "Other psychiatric inpatient" includes psychiatric inpatient services provided to TennCare (Medicaid) enrollees and to indigent patients through private psychiatric hospitals under contract with the TDMHSAS.
4 and 14	Employment and residential status updates are obtained after 6-months but before 7 months of last survey administered for TN's Community Survey System. For TN's Crisis Services System, updates are collected if there is more than one face-to-face encounter over the course of the reporting period.
4 and 15	One of the largest providers submitted fewer completed surveys in FY2019 than in FY2018. This resulted in a significant overall decrease in responses.
5A	In FY2019 the ability to determine funding status across multiple data systems improved. This improvement impacted counts across funding categories. This new methodology was retrospectively applied to FY2017 and FY2018 URS tables and FY2017 and FY2018 URS table were resubmitted to reflect this change and allow for consistent comparisons across FY 2017-FY 2019.
5A	TennCare (Medicaid) data is provided at the aggregate level, not client level. This does not allow for the de-duplication of clients across TennCare and TDMHSAS systems. It is possible for people counted under TennCare to also be counted under TDMHSAS data systems. Clients receiving care at state hospitals may become eligible for TennCare (Medicaid) services during their stay, resulting in a reimbursement of TDMHSAS dollars.
6	The number of unduplicated clients served by TennCare (Medicaid providers) at Residential Treatment Centers was higher at the beginning of FY2019 (n=671) compared to the beginning of FY2018 (n=590). Similarly, the total number of unduplicated clients served in FY 2019 (n=5,615) was higher than the total number of unduplicated clients served in FY 2018 (n=4,529). Similar increases can be seen in FY2020. This is in part due to an increase in the number of clients with SA and SED/SMI co-occurring diagnoses in need of residential treatment. The average length of stay of adults discharged from state hospitals decreased 26% in FY2020 compared to FY2019 in part because there was a significant decrease in the number of patients with stays greater than a year. There have been concentrated efforts to discharge patients from Regional Mental Health Institutes into supportive community settings. This may have contributed to decreasing patient stays that would have been greater to less than a year.
7	There was an overall increase in FY2019 MHBG funding compared to FY2018. However, between FY2018 and FY2019, there was a slight reduction in Medicaid and Medicare patients at the state Regional Mental Health Institutes and a reduction in community-based care funded by discretionary federal grants that were phased out. "Total Other Funds Expenditure" decreased by 17% in FY2020 compared to FY2019 as a result of expiring federal discretionary grants. "Total Local Funds expenditure" decreased by 30% in FY2020 compared to FY2019 because of a reduction of county forensic services, expiring local grants, and reclassification of expenses to "Other". "Total Other Expenditures" decreased by 26% in FY2020 compared to FY2019 due to a reduction of private insurance and self-pay. There is an increase in "Total EBP for ESMI Expenditures" for FY2020 when compared to FY2019 because there was an addition of state funds for First Episode Psychosis (\$190,000). "Other Psychiatric Inpatient Care" was an added row in FY2020. Funds previously reported in "Other 24-Hour Care (Residential Care)" were divided between "Other Psychiatric Inpatient Care" and "Other 24-Hour Care (Residential Care)" resulting in an 82% decrease in "Total Other 24-Hour Care Expenditures" in FY2020 compared to FY2019.
7A	In 2019 year, the First Episode Psychosis was expanded to two ways that contributed to the change in expenses: 1) a new provider was added to cover an additional county of the state; and 2) a new contract was established to employ a statewide trainer to provide training, technical assistance, and fidelity monitoring to Coordinated Specialty Care/OnTrackTN teams across the state. "Total CSC-Evidence-Based Practices for First Episode Psychosis Expenditures" increased in FY2020 because of the addition of state funds (\$190,000).

URS Table Number	General Notes
10	In the Federal Fiscal Year 2018 appropriation, Congress increased the funding for the federal Community Mental Health Block Grant (MHBG). After soliciting input from Tennessee's Planning and Policy Council Executive Committee, leadership from community behavioral health centers, consumers, family organizations, and other key stakeholders, the Department released following funding announcements (i.e. Announcements of Funding/AOF) in FY2019 as a result of this increase: Intensive Long Term Support; School Based Behavioral Health Liaisons; First Episode Psychosis; Tennessee Move Initiative; and the Older Adults Program. Announcements for these programs have all been released and many proposals are under review at the time of this report submission. Additionally, these new funds are supporting the enhancement of the Recovery Within Reach/Housing Within Reach website, creation of an Anti-Stigma Campaign related to mental illness and crisis services, and increasing resources for targeted transitional support services. Peer support and supported employment services will also be enhanced as a result of these funds.
12	This table only include TennCare (Medicaid) data. The 33% decrease in the percent of children served by the SMHA with co-occurring MH/SA diagnoses was the result of a rounding issue. In FY2019, the actual percent of children served by the SMHA with co-occurring MH/SA diagnoses was 2.6% (rounded to 3%) while the actual percentage was 2.4% (rounded to 2%) in FY2020.
12,14A & 15A	TennCare employs an operational definition of SMI/SED based on ICD10 behavioral health diagnosis and a 15-month claims history to categorize individuals as having serious mental illness (SMI/SED). Substance abuse disorders (SUD) were based on the presence of a primary or secondary diagnosis of substance abuse disorder (ICD-10 section F10-F19: Disorders due to psychoactive substance use). Co-occurring diagnoses were based on a primary mental health diagnosis and a secondary substance use diagnosis.
14A & 15A	In March 2015, Crisis Services stopped collecting data on diagnoses. Data from TennCare (Medicaid); TDMHSAS Behavioral Health Safety Net; state psychiatric hospitals; and private psychiatric hospitals that contract with TDMHSAS, are included in these tables.
16	Multi-Systemic Therapy (MST) services for Children with SED in Tennessee increased overall by 55% in FY2020 compared to FY2019 as a result of one provider expanding these services. The large percentage increase is somewhat exaggerated by the fact that total counts for this EBP were low (FY2019 - 222, FY2020 - 343) with the change in N merely 121.
16 & 17	A computer system transition in FY2019 by a large provider resulted in improvements in identifying duplicated clients. Additionally, a switch by a few providers to EBP's not found on the URS report caused a slight decrease to select FY2020 counts. Other Evidence Based Practices reported by providers include: CBT/CBT-Insomnia/CBT- Suicide Prevention, DBT, CPT, PE, RRT, EMDR, FT, Gottman, PCIT, ARC, CPP, TF CBT, CAP.
20A	The FY20 readmission rate of 10.6% across all state hospitals continues to be less than the national 30-day hospital readmission rate for psychiatric hospitals, which is 13% according to the "Tennessee 2019 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System" report. Though there are many variables that can affect readmission rates, TDMHSAS data suggests that the primary contributing factor is non-adherence to medication and treatment regimens that are recommended after discharge. Efforts have been made to increase community support systems for people with mental illness, including the Tennessee Behavioral Health Safety Net. These supports encourage improved compliance with discharge treatment plans and in turn, reduce the potential for readmission. There is a potential that COVID-19 has impacted individuals' ability to access and comply with recommended medication and treatment regimens which may be impacting re-admission rates.
21	This table only include TennCare (Medicaid) data. The large percentage increase for TennCare 180-day readmission rates in FY2018 (36%, 6,766) compared to FY2017 (29.18%, 5411) was due to a change in methods. When estimating this metric for FY2017, only claims incurred in FY2017 were considered, which is incorrect. Any claims prior to (July 1, 2016) associated with readmissions in FY2017 should have been considered. Using this correct method, the TennCare readmission rate for FY2017 should have been 34.5% which is similar to the FY2018 180-day readmission rate.
