**Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2020**

**Washington**

**Reporting Period: 7/1/2019 To: 6/30/2020**

<b>Adults and Children who meet the Federal Definition of SMI/SED</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who meet the Federal definition for SMI	86.0%	71.6%	77.0%	55
Percent of Children served through the SMHA who meet the Federal definition for SED	82.0%	71.1%	75.0%	55

<b>Co-occurring MH and Substance Abuse Consumers</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	19.0%	28.0%	25.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	2.0%	8.1%	3.0%	55
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	18.0%	27.4%	24.5%	54
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	2.1%	9.6%	3.0%	54

**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

If individuals received a HCA funded substance abuse service of any type during the reporting year; we consider that evidence of a substance abuse problem. Since they also have a mental health problem (because they received a mental health service), they are counted as having a co-occurring substance use disorder and mental health disorder.

**State Notes**

None

URS Table Number	General Notes
2A, 2B, 3, 4, 4A, 5A, 5B, 6, 12, 14A, 14B, 15A, 15, 16, 21	The HCA manages contracts with Behavioral Health Organizations (BHOs) for mental health (MH) and substance use disorder (SUD) treatment services in regions that have implemented Fully Integrated Managed Care (FIMC) since January 2019. As the state’s Medicaid program (called Apple Health) continues to implement FIMC across the state, the responsibility for behavioral health benefits coverage transfers from BHOs to FIMC plans. As a result, we are currently at the stage of data validation of encounter data within the Behavioral Health Data System (BHDS), due to data submission issues involving some of the submitting entities transitioning from BHOs to FIMC, to Behavioral Health Services Only (BHSO), and to Behavioral Health Administrative Service Organizations (BHASOs). While we have been continuing to conduct the validation testing of behavioral health data, the migration of data is still not fully realized, much less finalized. This is the primary reason that explains the percentage changes across tables of the 2020 URS Data.
7, 7A, 8, 10	As stated in the note for tables 2A/B, 3, 4/4A, 5A/B, 6, 12, 14A/B, 15, 15A, 16, and 21, the changes of expenditures from the administrative funds and/or program funds are ill-sutreated in these tables of HCA in 2020.
7	In 2020, BHOs worked to bill out all of their invoices prior to the BHO to IMC transition, which resulted in an increase in spending. State expenditures increased due to several pilot programs and the Governor’s initiative to increase mental health services. The EBP for ESMI expenditures include start-up expenditures for new programs in 2020.
7A	In 2020, there were increased investments in First-Episode Psychosis, including a few new teams.
8	MHBG expenditures from non-direct services increased due to additional investments in workforce development. Also, the BHOs spent out their block grant contracts prior to transitioning to the IMCs.
11	There are two possible explanations for the decrease in the percent of adults responding positively to outcomes. (1) this difference is not unexpected given the tremendous challenges in the past year due to the COVID-19 pandemic and the widespread need to limit in-person meetings/gatherings in Washington State starting in mid-March 2020 that continued throughout 2020. These limitations changed the ways in which health care services were administered including behavioral health services. While a majority of enrollees gave positive ratings in 2020 for access, quality, participation in treatment goals, and satisfaction with services, just 50% gave positive ratings on the outcome of services. This pattern indicates that despite the challenges in how behavioral health services were administered in 2020, enrollees continued to report positively about their experience with BH services. However, their overall outcomes were lower, likely due to the increased challenges, more generally, for achieving behavioral health in 2020 during the pandemic. (2) another possible explanation for the change in ratings is due to the data collection strategy used in 2020 compared to 2019. In 2019 and in previous years, we relied heavily on the telephone mode for data collection, with the web option offered as an alternative mode for completion, and paper surveys were also offered. In 2020, because of the limitations for in-person calling on site in the Social and Economic Sciences Research Center Data Collection Unit, we relied more heavily on postal mailings to enrollees to encourage completion of the survey on the web or on paper. Further study would be needed to determine if the differences in ratings was due to survey mode.
