Note:

Are Client Counts Unduplicated?

Unduplicated

Number of States with Unduplicated Counts

43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2019

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age Age calculated at midpoint of reporting period

Gender None

Race Race 'not available' includes clients that identified as 'other race' (N=1,192)

Overall Populated by NRI using Idaho's 2020 MH CLD-BCI dataset

Note:

This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2019

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 14a

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2020

Idaho Reporting Period: 7/1/2019 To: 6/30/2020

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	100.0%	71.6%	77.0%	55
Percent of Children served through the SMHA who meet the Federal definition for SED	100.0%	71.1%	75.0%	55

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	34.0%	28.0%	25.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	7.0%	8.1%	3.0%	55
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	34.0%	27.4%	24.5%	54
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	7.0%	9.6%	3.0%	54

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Percent of clients served by the SMHA with co-occurring MH/SA diagnosis=(number of clients that have a SUD Dx code listed in the "Substance Abuse (SA) Diagnosis" field the MH-CLD file (field number C-20))/(number of clients that have a MH Dx code listed in the "Mental Health Diagnosis - One" field in the MH-CLD file (field number C-17)). This process was preformed for both clients age 0-17 (Children) and 18+ (Adults).

General Notes FY 2020

Idaho

URS Table Number	General Notes
6	DBH client rosters, and therefore admissions to community programs, changed as a result of Medicaid expansion. The number of clients served reduced during the SFY and clients who would have previously come to us were diverted to Medicaid. The total number of these clients is difficult to determine because they went to Medicaid instead of being served by DBH.
7	DBH client rosters changed as a result of Medicaid expansion thereby reducing the number of clients served during the SFY. Many of the clients we transitioned were just med management clients or clients who were not receiving a significant amount of treatment services and therefore did not require Medicaid coverage. So although the number might be significant the cost of services they were receiving was not. Secondly, not only were our clients transitioned but clients who would have previously come to us were diverted to Medicaid at the start of their episode. It is difficult to determine how many clients we didn't serve because they went to Medicaid instead of being served by DBH.
12	The change in consumers served by DBH with co-occurring MH/SA diagnoses is likely due to the transition of clients from DBH rosters to Medicaid as a result of and as included in the plan for Medicaid Expansion in Idaho.
17	The change in consumers receiving Integrated Dual Diagnosis services is likely due to the transition of clients from DBH rosters to Medicaid as a result of and as included in the plan for Medicaid Expansion in Idaho.
17	The change in consumers receiving medication management services is likely due to the transition of clients from DBH rosters to Medicaid as a result of and as included in the plan for Medicaid Expansion in Idaho.
