

Montana 2020 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,013,396	69.68	24.58	58
Community Utilization per 1,000 population	7,801,366	68.82	23.93	58
State Hospital Utilization per 1,000 population	125,305	0.79	0.38	53
Other Psychiatric Inpatient Utilization per 1,000 population	408,959	2.28	1.47	40

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	776,983	61.2%	47.1%	57
Employed (percent with Employment Data)**	776,983	35.2%	23.6%	57

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	67.3%	79.6%	49

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	63.3%	74.6%	45

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	7,008	9.6%	9.2%	48
State Hospital Readmissions: 180 Days	15,085	23.8%	19.9%	49
State Hospital Readmissions: 30 Days: Adults	6,499	9.6%	9.4%	48
State Hospital Readmissions: 180 Days: Adults	13,916	23.8%	20.2%	49
State Hospital Readmissions: 30 Days: Children	509	0.0%	7.3%	16
State Hospital Readmissions: 180 Days: Children	1,169	0.0%	16.7%	19

Living Situation	U.S.	State	U.S. Rate	States
Private Residence	4,199,185	34.6%	84.7%	57
Homeless/Shelter	216,731	3.7%	4.4%	52
Jail/Correctional Facility	72,275	8.3%	1.5%	51

Adult EBP Services	U.S.	State	U.S. Rate	States
Supported Housing	70,648	-	2.3%	30
Supported Employment	66,662	0.2%	1.9%	41
Assertive Community Treatment	66,159	2.1%	1.8%	42
Family Psychoeducation	37,853	-	3.1%	16
Dual Diagnosis Treatment	199,597	-	9.5%	24
Illness Self Management	308,378	0.9%	19.1%	22
Medications Management	545,051	-	31.3%	21

Child/Adolescent EBP Services	U.S.	State	U.S. Rate	States
Therapeutic Foster Care	13,178	-	1.7%	21
Multisystemic Therapy	31,303	-	4.1%	20
Functional Family Therapy	31,817	-	5.8%	15

Change in Social Connectedness	State	U.S. Rate	States
Adult Improved Social Connectedness	70.7%	79.2%	46
Child/Family Improved Social Connectedness	85.3%	88.4%	42

*Denominator is the sum of consumers employed and unemployed.

**Denominator is the sum of consumers employed, unemployed, and not in labor force.

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2020

Montana

Reporting Period: 7/1/2019 To: 6/30/2020

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	100.0%	71.6%	77.0%	55
Percent of Children served through the SMHA who meet the Federal definition for SED	100.0%	71.1%	75.0%	55

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	28.0%	28.0%	25.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	5.0%	8.1%	3.0%	55
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	28.0%	27.4%	24.5%	54
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	5.0%	9.6%	3.0%	54

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Dual diagnosis percents were based on MH clients with a SA diagnosis (excluding nicotine) in paid claims. Please see General Notes for percentages when including nicotine.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Table 3 State Notes:

Age The 107 RTC clients aged 21+ represent those served in MT MH Nursing Care Center. See General Comments for MSH and PRTF ages.
 Overall See General Notes
 Gender None

Table 6 State Notes:

Hospital Avg LOS in discharged MSH adults was longer in FY20 compared to FY19 (148 vs 104) due to 7 patients discharged in FY20 whose LOS was >2,000 days vs just 1 patient in FY19 whose LOS was >2,000 days.
 Other Inpatient None
 Residential Includes MCD and HMK PRTF youth (see note on T3 regarding age.) See Gen Notes for RTC data for the 107 RTC MT MH Nursing Care Ctr patients.
 Community "Served at beginning of Year" based on <90 days between LDOS in FY19 and FDOS in FY20. Admissions during year based on >90 days between two consecutive dates of service. Also see General Notes.
 Overall None

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
MT	Yes	Yes	-	Yes	-
US	36	25	3	7	25

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

Age Age calculated at midpoint of reporting period

Gender None

Overall Employment status is tracked only for clients receiving case management services at community mental health centers, clients in grant-funded programs, and MHSIP Survey recipients. See also General Notes.

Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2020

Montana

Reporting Period: 7/1/2019 To: 6/30/2020

Montana

URS Table Number	General Notes
3 & 15A	There were fewer clients served in PRTFs in FY20 compared to FY19 due to the closure of the largest PRTF (Acadia Montana). Additionally, COVID-19 contributed to a decrease in the number served, as PRTFs have implemented safety measures for admits/discharges.
3 & 15A	There were fewer clients served in Other Psychiatric Inpatient settings likely due to the impact of COVID-19.
3	To represent PRTF and MSH age restrictions, 19 PRTF clients who had turned 18 by the midpoint of the reporting period are included in the 0-17 age group; and three 17-yr-old youth served at MSH are included in the 18-20 age group. Montana MH Nursing Care Center served 107 clients in FY20 aged 37+. These clients are listed under RTC on Table 3, but Table 6 addresses their data in the General Notes instead.
4	The increase in number of consumers employed (7% employed increase in FY20 among adults with a known employment status) and number unemployed (5% increase in FY20 among adults with a known employment status) is partially due to increased data collection for clients receiving grant-funded services. In addition, the increase in number unemployed may also be influenced by the COVID-19 pandemic.
5A & 5B	The increase in number of consumers funded by both Medicaid and Non-Medicaid funding compared to FY19 was due to the use of grant funding for non-Medicaid reimbursable services, such as crisis services (including mobile crisis response and jail-based crisis services).
6	To differentiate LOS data for youth PRTFs vs adult MT MH Nursing Care Center, Table 6 only includes Residential Treatment Facility youth data. MMHNCC data is included here instead: Length of Stay (in Days): Discharged Patients: Average(Mean)=1,317. Median=577. For Clients in Facility for 1 Yr or Less: Length of Stay (in Days): Residents at end of Yr: Avg(Mean)=188. Median=210. For Clients in Facility More than 1 Yr: Length of Stay (in Days): Residents at end of Yr: Avg(Mean)=2,008. Median=1,496.
6	There were fewer clients served in PRTFs in the beginning of FY20 compared to FY19 (134 vs. 169) due to the closure of the largest PRTF (Acadia Montana) in June/July, 2019.
6	Fewer clients were served in Community Programs at the beginning of the year, and more clients were counted as new admissions during the year, likely due to the impact of COVID-19, with more clients having a gap in services greater than 90 days, resulting in fewer clients on the books at the beginning of the year (based on the 90-day administrative rule) and more clients counting as a new admission throughout the year.
7 & 7A	Based on guidance from SAMHSA, the way expenses are counted changed from 2019 to 2020. Previously, expenses incurred (when they were provided) during the reporting period were reported. Starting this year, expenses paid during the reporting period are reported. Going forward we will be consistent in our methodology in how we pull expenses for this report.
7	Medicaid expenditures for Other 24-Hour Care decreased because Chemical Dependency Inpatient treatment was included here in FY19, but not in FY20. Administration expenditures increased because (1) some salaries and benefits were included in FY20 that were not included in FY19, and (2) FY19 reflected all expenses that were incurred during FY19, but FY20 reflected all expenses that were recorded in FY20.
7	The increase in Total MHBG Expenditures in FY20 compared to FY19 is due to the incorporation of four programs into the MHBG that MT did not have in FY19 classified under Ambulatory/Community Non-24-Hr Care, including Communities that Care, System Development, Other Technical Assistance and Crisis Center for Suicide Prevention.
7	The decrease in Total Other Funds Expenditures between FY19 and FY20 is directly related to the PATH grant spending, which was slightly up for the first eight months of FY20 (through February, 2020). Thereafter, expenses were about 50% that of FY19, most likely due to the COVID-19 pandemic.
12	Nicotine-related diagnoses were excluded when calculating percent with "Substance Use Problem" in Table 12. When nicotine-related diagnoses are included, the % of those with a co-occurring disorder increases to 44% for Adults and 6% for Youth. For the BCI, adult clients who had a "Substance Use Problem" included not only those with a documented SUD dx, but also clients indicating a substance use disorder (including tobacco) obtained from data through Recovery Markers, 72-hr program, County&Tribal Matching Grants, MHBG programs, and the MHSIP Survey without a specific SUD diagnosis documented in paid claims (which increased the percent for adults with a Substance Use Problem to 46%; Youth remained at 6%). Nicotine-related diagnoses were only listed in the BCI if there were no non-Nicotine SUD diagnoses. Qualifying diagnoses excluded dxs in remission, which was a change from FY19.
15	The decrease in Private Residence compared to FY19 is due to less data collection at community mental health centers due to fewer clients receiving case management services. The decrease in Homeless/Shelter compared to FY19 is likely due to the decision to no longer use address information to identify homelessness based on address unreliability, as reflected in changes to the Crosswalk. The decrease in Residential Care and the increase in Crisis Residence compared to FY19 is likely due to the impact of the COVID-19 pandemic.
