### Note:

Are Client Counts Unduplicated?

Unduplicated

Number of States with Unduplicated Counts

43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2019

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

### **State Notes:**

Table 2a

Age None

Gender Pregnancy data is not collected in USTF.

Race Pacific Islanders are coded in USTF data as a single category Asian/Pacific Islander. All results are listed under Asian in URS

table. USTF system does not have a code for multiple races.

Overall Since the 2020 removal of Hispanic Origin from URS Table 2A, consumers coded in USTF with Race/Ethnicity coded as

"Hispanic" have been included in "Race Not Available."

Table 2b

Age None Gender None Race None

Overall The New Jersey State Mental Health Authority does not collect data on pregnant women.

#### Note:

This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2019

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

## State Notes:

# Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2020

New Jersey Reporting Period: 7/1/2019 To: 6/30/2020

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	41.7%	71.6%	77.0%	55
Percent of Children served through the SMHA who meet the Federal definition for SED	35.8%	71.1%	75.0%	55

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	22.0%	28.0%	25.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	3.0%	8.1%	3.0%	55
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	28.0%	27.4%	24.5%	54
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	4.0%	9.6%	3.0%	54

#### Note

This table uses data from URS Table 12.

#### How are the number of clients with co-occurring disorders counted and calculated?

There are two steps to identifying co-occurring clients in our USTF database: 1. Do they meet the SMI requirement of a GLOF of 0-5? 2. Do any of the following areas in the database indicate drug or alcohol abuse: 1. Referral Source (e.g. from Alcohol & Drug Treatment Program). 2. Past Services History. 3. Current Services Involvement. 4. Non-Mental Health Needs. 5. Primary Problems. There are two steps to identifying co-occurring clients in our USTF database: 1. Do they meet the SMI requirement of a GLOF of 0-5? 2. Do any of the following areas in the database indicate drug or alcohol abuse: 1. Referral Source (e.g. from Alcohol & Drug Treatment Program). 2. Past Services History. 3. Current Services Involvement. 4. Non-Mental Health Needs. 5. Primary Problems. If both criteria are met, then the consumer is coded as a co-occurring client.

#### Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

## General Notes FY 2020

# **New Jersey**

URS Table Number	General Notes
3, 6	State hospital data in Tables 3 and 6 are from DMHAS's Hospital Census (Oracle) database whereas that in Table 2a is from the USTF client registry.
6	The decrease in state psychiatric hospital admissions reflects a continuation of reduced institutional utilization since 2010. Diversionary activities have resulted in fewer hospitalizations in favor of services in community settings. The reduction in reported admissions to Community Programs results from a combination of COVID-related changes to service delivery (e.g. telehealth services) as well as reporting difficulties caused by outdated data system technology of the Unified Services Transaction Form (USTF). The USTF, SMHA's current client registry, consists of an Access-based secure file data transfer process, no longer in use by some providers due to expired system compatibility and/or agency-specific software updates. SMHA is currently upgrading its client registry to a web-based system and will have funded providers begin testing the system in the Spring of 2021. This upgrade will improve data collection capability and reporting. Admissions and discharges to Other Psychiatric Inpatient during the year has shown a significant decrease due to the overall reductions in reported admissions described above. COVID-related changes in service delivery extend beyond telehealth services to include minimized staffing as well as reduced capacity in observance of social distancing protocols. These changes combined with the technological barriers surrounding USTF have resulted in a major decrease in the reporting of admissions, discharges, and overall service utilization during 2020. Additional context from the SMHA's Systems Review Committee data reflect a reduction in reported admissions to Short-Term Care Facilities from 13,491 in 2019 to 10,634 in 2020, providing another example of reporting difficulties and changes to community capacity. Increases in average length of stay for consumers in state hospitals is a reflection of reduced community capacity, i.e. available discharge settings. Due to COVID-19, many community beds have been closed to observe social distancing protocols among residents/consumers. This res
7	Total MHBG Expenditures: \$13,807,378 expenditure occurred in SFY 2020 ending June 30, 2020. \$5,800,000 was expended in the beginning of August 2020 as part of SFY 2021. This explains why only \$13,807,378 instead of \$19.6 million were expended in SFY 2020 ending June 30, 2020. Total Medicaid Expenditures: the total Medicaid Expenditures were updated to \$831,507,437 because the amount in two categories (Other 24-hour Care and Ambulatory/Community Non-24 Hour Care) was modified. In prior years, SMHA only included Medicaid expenditures related to the Department of Children and Families (DCF) Medicaid figures. For the State Fiscal Year 2020 report, SMHA included the Medicaid behavioral healthcare spending for the adult population. The change is believed to represent more accurate state spending. Total EBP for ESMI Expenditures: the SMHA has included entire amount of the SFY20 First Episode Psychosis (FEP) expenditures. Total Ambulatory/Community Non-24-Hour Care Expenditures: this is also primarily due to the change to an approach that SMHA believes is more accurate, i.e. to include Medicaid spending for the adult population. Grand Total Expenditures: the reasons for the increased grand total expenditure have been explained in the previous four comments.
8	The change has occurred since SMHA has expended \$23,912 for Planning Council compared to \$7,584 for the last year.
9, 11, 11a, 19a	The Adult Consumer Survey components will be updated by SMHA as soon as the information becomes available.
10	All Block Grant allocation amounts are listed in the Adult/SMI Column as we are unable to provide a breakdown.
12	Percentage of children/adolescents meeting Federal definition of SED in FY 2020 was provided by Children System of Care. Therefore, the number was not comparable to the 37% reported in FY 2019. The percent of children/adolescents meeting federal definition of SED in 2020 has been revised to 35.8% in accordance with individuals served by the SMHA. This previously reported 45% was refective of individuals served by the Children's System of Care (CSOC).
15a	State hospital data in Table 15A is from DMHAS's Hospital Census (Oracle) database. Data reported reflects the clients served as of 6-30-2020 and admissions between 7/1/2019 and 6/30/2020.
16	SMHA was able to provide the age gender and race/ethnicity breakdown of the total number with SMI/SED served. However, SMHA could not provide the breakdown of the EBPs. The total number served for each EBP, was therefore, grouped under the category "Not Available". This grouping method resulted in the number receiving a specific EPB exceeding the total number with SMI/SED served.

URS Table Number	General Notes
17	Illness Self Management and Recovery: Historically, the number of agencies that submit data vary from year to year. The same total number of CSS programs (15) submitted data in FY19 and FY20. With regard to PC/PH agencies that reported stats, there was a reduction; 41 submitted in FY19 and 33 submitted in FY20. With regard to all agencies, it is safe to say that the COVID pandemic made it more challenging for agencies to submit their FY20 numbers. However, because agencies are not mandated to submit data, the numbers are never as robust as we would like to have on record. There is a lot more IMR implementation happening than is reported. SMHA was able to provide the age gender and race/ethnicity breakdown of the total number with SMI/SED served. However, SMHA could not provide the breakdown of the EBPs. The total number served for each EBP, was therefore, grouped under the category "Not Available". This grouping method resulted in the number receiving a specific EPB exceeding the total number with SMI/SED served. In FY 2019, a total of 2,598 families received Family Psychoeducation Services. Also in FY2019, 3,519 family members received Family Psychoeducation Services. In FY 2020, a total of 3,353 family members received Family Psychoeducation Services.
20A	This reduction from 14% in 2019 is a continued reflection of the decline of state psychiatric hospital utilization due to diversionary practices and COVID-related changes to service delivery and protocol.
21	SMHA does not collect readmission data on other psychiatric units than those in state psychiatric hospitals.
