* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Estimates in the 2020 column are italicized to indicate caution should be used when comparing estimates between 2020 and prior years because of methodological changes for 2020. Due to these changes, significance testing between 2020 and prior years was not performed. See the *2020 National Survey on Drug Use and Health: Methodological Summary and Definitions* for details.

¹ These estimates may be inconsistent with estimates presented in other detailed tables because NSDUH data are not edited for consistency across discrete sections of the interview, except with regard to skip logic.

Definitions: Measures and terms are defined in Appendix A.
