\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Estimates in the 2020 column are italicized to indicate caution should be used when comparing estimates between 2020 and prior years because of methodological changes for 2020. Due to these changes, significance testing between 2020 and prior years was not performed. See the *2020 National Survey on Drug Use and Health: Methodological Summary and Definitions* for details.

<sup>1</sup> Information about past year use of pipe tobacco was not collected. The estimate for tobacco product use (as well as the estimate for tobacco product use or nicotine vaping) in the past year excludes past year pipe tobacco use, but includes past month pipe tobacco use.

<sup>2</sup> Estimates of binge alcohol use include use by those who were heavy alcohol users.

Definitions: Measures and terms are defined in Appendix A.
