* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Estimates in the 2020 column are italicized to indicate caution should be used when comparing estimates between 2020 and prior years because of methodological changes for 2020. Due to these changes, significance testing between 2020 and prior years was not performed. See the *2020 National Survey on Drug Use and Health: Methodological Summary and Definitions* for details.

NOTE: Specialty facilities for substance use treatment include hospitals (inpatient only), rehabilitation facilities (inpatient or outpatient), or mental health centers. Estimates include people who received treatment specifically for illicit drugs or alcohol, as well as people who received treatment for unspecified substance(s). Questions on virtual substance use treatment were added in Quarter 4 of 2020. Estimates in this table do not include data from these questions. Data on virtual substance use treatment are included at the end of this section. See the *2020 National Survey on Drug Use and Health: Methodological Summary and Definitions* for details.

¹ Other Employment includes students, people keeping house or caring for children full time, retired or disabled people, or other people not in the labor force.

Definitions: Measures and terms are defined in Appendix A.
