\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Estimates in the 2020 column are italicized to indicate caution should be used when comparing estimates between 2020 and prior years because of methodological changes for 2020. Due to these changes, significance testing between 2020 and prior years was not performed. See the *2020 National Survey on Drug Use and Health: Methodological Summary and Definitions* for details.

NOTE: Estimates in this table for 2020 exclude a subset of respondents who did not complete the questionnaire. The analysis weights and estimates were adjusted for the reduced sample size. Therefore, some estimates in this table could differ from corresponding estimates in other tables that did not undergo sample size adjustments. See the *2020 National Survey on Drug Use and Health: Methodological Summary and Definitions* for details.

<sup>1</sup> The total row includes respondents with missing underage drinking information.

<sup>2</sup> Respondents with unknown responses were excluded from the respective analyses.

<sup>3</sup> Respondents could indicate multiple locations for the most recent time they used alcohol; thus, these response categories are not mutually exclusive.

<sup>4</sup> Respondents could specify other locations for "Some Other Place." The "other" locations listed are among the most common write-in responses. Invalid write-in responses were excluded from this analysis.

Definitions: Measures and terms are defined in Appendix A.
