\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Estimates in the 2020 column are italicized to indicate caution should be used when comparing estimates between 2020 and prior years because of methodological changes for 2020. Due to these changes, significance testing between 2020 and prior years was not performed. See the *2020 National Survey on Drug Use and Health: Methodological Summary and Definitions* for details.

NOTE: Respondents were asked about driving a vehicle while under the influence of specific substances. Respondents with unknown driving under the influence information were excluded.

<sup>1</sup> Selected Illicit Drugs include the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

<sup>2</sup> Selected Illicit Drugs Other than Marijuana include the use of cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

<sup>3</sup> Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>4</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>5</sup> Other Health Insurance is defined as having Medicare, military-related health care, or any other type of health insurance.

Definitions: Measures and terms are defined in Appendix A.
