2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Tho	om State Hospitals, due to concern about COVID spreading.
	ne Crisis Services set-asides were created in SFY 21-22; therefore, for this reporting period, we've left these bles blank.
Eme the allow	otal Medicaid Expenditures: For Medicaid, the numbers are definitely impacted by the Public Health nergency. There were two accommodations that drove Short Doyle Medi-Cal FFP expenditures, first there was a increase in FFP from either 50% to 56.2% or 65% to 69.34%. The second was accommodation for rates that owed the maximum claimable amount for a service to be doubled for county owned providers. The assumption as that both of the accommodations would be budget neutral due to lower expected claiming.
Tota	otal Other Funds Expenditures: DHCS cannot offer a response to the questions about Local Funds and Other unds spending, as local MH spending varies across state and tends to fluctuate across State Fiscal Years.
	otal Local Funds Expenditures: Local MH spending varies across state and tends to fluctuate across State scal Years.
7B DHO	HCS did not incur expenditures under the categories listed for SFY 20-21.
16 which	otal number of consumers receiving Supported Housing services. The total decline was 315 consumers, of nich San Bernardino County accounted for 273. Total number of consumers receiving MST services: The total ecline was 451 consumers, of which San Bernardino County accounted for 454, more than the total decline.
16A Cell	ells with numerical data from counties with a population of less than 100,000 are suppressed.
	otal number of consumers receiving Medication Management services: The total decline was 5,123 nsumers, of which San Bernardino County accounted for 3,722.
19A, 19B Pati	atients found the "how long" question confusing, so we weren't able to categorize some surveys by duration of re.
20A 10% The	otal readmitted within 180 days: The n is small. Most State Hospital patients are forensic patients. Less than 1% of patients are non-forensic. There were only 4 patients readmitted within 180 days in Report Year 2022. Here were zero patients readmitted within 180 days in Report Year 2021. There were four patients readmitted thin 180 days in Report Year 2022.
20B and	addition, this decrease can be attributed to COVID-19 as DSH had to temporarily suspend IST admissions addischarges to mitigate the impacts of COVID-19 throughout its hospitals in addition to court closures and unty COVID-19 impacts.
20B Tota	otal readmitted within 180 days: Fewer patients were readmitted, because Covid made readmissions more

Errata Sheet to the 2022 URS Output Tables

This page includes clarifications and corrections to the 2022 URS Output Tables.

ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022

The table counts and percentages have been updated due to a processing error.

OUTCOMES DOMAIN: Consumer Survey Results, FY 2022

The percentages have been updated in Response Rate for "Children: U.S." and "Adults: U.S. Average" due to a processing error.
