

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

New Jersey 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

- Table 2a**
- Age None
 - Gender Current Data System only captures Male and Female gender categories.
 - Race Pacific Islander are coded in USTF data as a single category Asian/Pacific Islander. All results are listed under Asian in URS table. USTF system does not code for multiple races.
 - Overall The NJ State Mental Health Authority does not collect data on pregnant women.
- Table 2b**
- Age None
 - Gender Current Data System only captures Male and Female gender categories. Pregnancy is not collected in USTF.
 - Race None
 - Overall None

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 14a

Age None
 Gender Current Data System only captures Male and Female gender categories.
 Race The New Jersey State Mental Health Authority does not collect race data for "Native Hawaiian or Other Pacific Islander" or for "More than One Race Reported."
 Overall None

Table 14b

Age None
 Gender Current Data System only captures Male and Female gender categories.
 Race The New Jersey State Mental Health Authority does not collect race data for "Native Hawaiian or Other Pacific Islander" or for "More than One Race Reported."

General Notes FY 2022

New Jersey

URS Table Number	General Notes
6	Some providers were not able to submit the data in the current system in FY 2022. DMHAS is in the process of developing an online web-based application for providers to submit data going forward.
7	The reason for the decrease in expense from 2021 to 2022 for "Other Funds" was due to short-term Covid Grants with expenses being incurred primarily during the 2021 period (7/1/20-6/30/21).
7	The reason for the decrease in expense from 2021 to 2022 for "EBP for ESMI" is due primarily to the timing of actual payments to our 3 FEP providers (Care Plus, Oaks, Rutgers). The reason for the delay in payments was due to late submissions from the providers due to Covid i.e. staffing issues. In addition, we saw lower expenses from the providers in general due to Covid (primarily Oaks).
7A	The reason for the decrease in expense from 2021 to 2022 for "EBP for ESMI" is due primarily to the timing of actual payments to our 3 FEP providers (Care Plus, Oaks, Rutgers). The reason for the delay in payments was due to late submissions from the providers due to Covid i.e. staffing issues. In addition, we saw lower expenses from the providers in general due to Covid (primarily Oaks).
15	Total number of consumers Homeless/shelter may have decreased because there was a moratorium on evictions and rental assistance which helped people maintain their placements.
15	Total number of consumers in Jail/Correctional Facility": The difference is the number of individuals jailed and not tied to the previous year.
16	The age and gender by category information are available for most Adults with SMI served. Therefore, the total number of consumers whose age is NA with SMI served is smaller than the total number of consumers whose age is NA receiving supported housing services, receiving supported employment services, and receiving ACT services. We have reorganized the data so that the total number of consumers whose age is NA with SMI served is greater than the total number of consumers whose age is NA receiving supported housing services, receiving supported employment services, and receiving ACT services. We have also reorganized the data so that the total number of consumers whose gender is NA with SMI served is greater than the total number of consumers whose gender is NA receiving supported housing services, receiving supported employment services, and receiving ACT services.
16	The total number of youth receiving MST services decreasing by 31% from 2021 to 2022 may reflect a decline to these services and/or workforce capacity during the pandemic. The 2021 volume of youth statewide receiving this service from qualified providers was relatively low (93 youth). We caution against perceiving the large percentage change as evidence of a significant decrease in utilization, as there were more significant increases by number in other CSOC services lines.
16	The total number of youth with SED increased by 25% from 2021 to 2022 for several reasons. Post-pandemic, the total population of youth receiving CSOC services has increased as has the demand for higher acuity services, which is reflective of the general increase in need for mental health services for all youth seen across the nation, due to the increased stress and trauma of living through a pandemic and being unable to connect with peers and supportive, non-caregiving adults in person for an extended period of time.
16	Total unduplicated N - Children with SED data for Ages 0-20, provided by the Children's System of Care (CSOC).
16A	The "current" means the time period from 7/1/2021-6/30/2022. In FY 2021 URS data table, when calculating current number served, the time point 6/30/2021 was used. SMHA has revised the numbers on the FY 2021 URS table 16a and put the definition of "current" in a footnote under the table.
16B	NJ 24/7 Mobile Crisis Team and Crisis Stabilization Programs were not in operation as of 6/30/2022. No data to report.
17	After consulting with the previous contractor, as of 3/23/21, New Jersey decided not to report the number of family members receiving family psychoeducation services in Table 17.
17	We have reorganized the data in Table 16 so that the total number of consumers whose age or gender is NA with SMI is greater than the total number of consumers whose age or gender is NA receiving Illness Self Management services.
17	The difference in total reported numbers of IMR clients served (FY21 clients served=3298 vs. FY22 clients served=4045) was influenced by the number of reporting programs, their size and capacity to deliver IMR. Additionally, it is important to consider how the transfer from telehealth services to a more hybrid model in FY22 may have also impacted the total number of clients served with IMR.

URS Table Number	General Notes
19A	The NJ SMHA (NJ DMHAS) contributed only adult data. The Children's system of care (CSOC) contributed both response data on kids & adults. The adult data found in this table (19a) sums up the data provided by CSCOC and the adult system of care (NJ DMHAS).
20A	The data system changed and we lost access to the older system and could not rerun the analyses. Therefore, we could not provide an updated number or provide an explanation.
21	Systems are not integrated to allow for this table to be completed.

Errata Sheet to the 2022 URS Output Tables

This page includes clarifications and corrections to the 2022 URS Output Tables.

ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022

The table counts and percentages have been updated due to a processing error.

OUTCOMES DOMAIN: Consumer Survey Results, FY 2022

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
