

2023 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2023 URS Output Tables present findings from 58 states and U.S. territories. The U.S. Virgin Islands was omitted because they did not submit any data. Each output table provides summary information on the SMHA clients served in 2023: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2023, 8,253,780 clients received SMHA services from 58 states and U.S. territories/jurisdictions. This is an increase from 8,180,236 clients served by the SMHAs in 2022. There were 6,015,438 adults (or 23.0 per 1,000), 2,229,152 children (or 30.7 per 1,000) served. Age data was missing for 9,190 (0.1 percent) clients served.
- Among SMHA clients, there were 4,418,899 (53.5 percent) females served while there were 3,766,336 (45.6 percent) males served. In the majority of states (41), more females were served than males, and in the remaining states (17), more males were served than females.
- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 22.5 percent, children ages 13-17 with 12.7 percent, and children ages 6-12 with 11.8 percent.
- Over half of SMHA clients served were White, comprising the largest racial category at 56.8 percent; Black or African American clients comprised the next largest group with 17.3 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (68.5 percent), while 15.2 percent were Hispanic.

Arizona 2023 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 Population	8,253,780	59.33	24.50	58
Community Utilization per 1,000 Population	8,003,047	57.01	23.75	58
State Hospital Utilization per 1,000 Population	114,039	0.03	0.34	54
Other Psychiatric Inpatient Utilization per 1,000 Population	385,614	1.15	1.33	41

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	913,040	50.6%	52.6%	58
Employed (percent with Employment Data)**	913,040	48.0%	28.0%	58

Notes:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 44

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2022-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served. The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race. The penetration rates for Transgender, Gender Non-Conforming, Other gender, Some Other Race, as well as Age, Gender, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2A

Age Age is defined as the age at first service in the report period.
 Gender Only Female and Male are collected for Gender.
 Race None
 Overall None

Table 2B

Age None
 Gender None
 Ethnicity AZ does not collect Hispanic as Ethnicity. It is collected under the same field as Race.
 Overall None

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 3 and from U.S. Census Bureau. All denominators for penetration rates use the SC-EST2022-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

The penetration rates for Transgender, Gender Non-Conforming, and Other gender, as well as Age Not Available and Gender Not Available are not reported on this table because the U.S. Census data does not include these categories.

State Notes:

- Age Age is defined as the age at first service in the report period.
- Gender Only Female and Male are collected for Gender.
- Overall None

Notes:

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2022-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served. The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Transgender, Gender Non-Conforming, Other gender, Some Other Race, as well as Age, Gender, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 14A

Age Age is defined as the age at first service in the report period.
 Gender Only Female and Male are collected for Gender.
 Race None
 Overall Persons with SMI or SED were identified using ICD-10 diagnosis, based on a diagnosis list provided by our medical coding team and may not reflect other state reports that include persons with SMI or SED.

Table 14B

Age None
 Gender None
 Ethnicity AZ does not collect Hispanic as Ethnicity. It is collected under the same field as Race.
 Overall None

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

Table 3 State Notes:

Age Age is defined as the age at first service in the report period.
 Gender Only Female and Male are collected for Gender.
 Overall None

Table 6 State Notes:

State Psychiatric Hospital The adolescent program at the State Hospital was closed prior to end of FY2010.
 Other Psychiatric Inpatient None
 Residential Treatment Centers None
 Community Mental Health Programs None
 Overall None

Notes:

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

State Notes:

State Psychiatric Hospitals The adolescent program at the State Hospital was closed prior to end of FY2010.

Other Psychiatric Inpatient None

Residential Treatment Centers None

Overall None

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition of SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring Mental and Substance Use Disorders, FY 2023

Arizona

Reporting Period: 7/1/2022 To: 6/30/2023

Adults and Children Who Meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	58.8%	70.9%	77.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	46.5%	69.3%	74.0%	57

Co-Occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring M/SUD	23.0%	27.1%	24.5%	56
Percent of Children served through the SMHA who had a co-occurring M/SUD	1.8%	6.9%	2.5%	54
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	7.3%	26.8%	25.0%	54
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	1.4%	6.9%	2.5%	54

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Using ICD-10 Mental Health Diagnosis Codes in the person's claim/encounters

State Notes:

None

Ethnicity Not Available	-	-	16,519	7.8%	-	4.3%	43

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

State Notes:

See General Comments.

Forensics included in "non forensic" data? No

Notes:

U.S. figures are based on states reporting. This table uses data from URS Tables 20A and 20B.

The ethnicity categories may not sum to the total number of readmissions and discharges because some states do not collect and report ethnicity separately from race.

State Notes:

This is CIVIL data only for FY 2023.

Arizona

URS Table Number	General Notes
4	There were slight decreases in “employed” numbers. This could be due to the discontinuation of the Public Health Emergency and continuous coverage, which could have been clients who dropped from these categories. Also, the data source for this table comes from self-reported data, which can lead to inconsistencies in the data received.
5A	The increases in this data may be attributed to the end of the Public Health Emergency and clients having to renew their Medicaid eligibility, which may have caused them to move from Medicaid to Non-Medicaid funding.
7A	For COVID-9 Relief, ARP Funds, and BSCA Funds AHCCCS cannot report the expenditures for Other 24-Hour Care (Residential Care) and Ambulatory/Community Non-24-Hour Care.
7C	<p>Arizona has historically reported that the state cannot break out reporting for Table 7C due to their braided funding model. AHCCCS has worked with contracted health plans with Regional Behavioral Health agreements and AHCCCS complete Care contracts to collect expenditure data to meet the reporting structure requested by 7c for this reporting period.</p> <p>AHCCCS has worked with contracted health plans with Regional Behavioral Health agreements and AHCCCS Complete Care contracts to collect expenditure data to meet the reporting structure requested in 7C for this reporting period. Arizona is working on more detailed deliverables from the health plans which will impact future URS reporting.</p> <p>Crisis services were not reported by individual category in the financial statements for the ALTCS line of business (\$3.7M) or AZ Tribes (\$248K); their totals were proportionally treated across the three crisis categories. Mental Health Block Grants for Call Centers includes RBHA reported funds for statewide call center from MHBG and direct MHBG contract to the call center for local crisis text and chat services.</p> <p>MHBG for Strategic Planning and Coordination: Funding allocated to the RBHA for coordination with 911 PSAPs (non-service).</p> <p>Other Funds for Call Centers: Includes funding from 988 State and Territory cooperative agreement and 988 Supplemental BSCA funding expended during the reporting period and does not include indirect costs.</p>
8	Arizona expended \$1,067,247.07 in MHBG administrative expenses, \$155,206.31 in MHBG COVID-19 administrative expenses, and \$22,138 in MHBG ARPA administrative expenses in SFY2023. Arizona does not track administrative expenditures in its Statewide Accounting System in the requested Activity categories.
9, 11, 11A, 19A, 19B	Effective July 1, 2016 the Arizona Department of Health Services/Division of Behavioral Health Services (ADHS/DBHS) merged with the state Medicaid agency (Arizona Health Care Cost Containment System-AHCCCS) as a result of the state's administrative simplification. As part of this process, AHCCCS reviewed all ADHS/DBHS deliverables, including the Member Satisfaction Survey, to understand data methodologies and streamline data sources. AHCCCS continues to evaluate the best method to collect this data from our members. AHCCCS is also in the process of adding the MHSIP Survey components into the MCO contract member survey requirements for the 10/1/2024 contract amendment. Once these requirements are established, this data will be included in URS reporting.
12, 14A, 14B, 16A, 16B, 17	Persons with SMI or SED were identified using ICD-10 diagnosis, based on a diagnosis list provided by our medical coding team and may not reflect other state reports that include persons with SMI or SED.
14A	<p>See https://www.azahcccs.gov/shared/Downloads/MedicalPolicyManual/300/320P.pdf.</p> <p>Increases in the percentages of adults and children meeting the federal definition of SMI and SED can be correlated with a demonstrated decrease in infection rates and a reduction in the perceived threat of the overall populace related to COVID-19 in addition to the end of the federal public health emergency. As people left their homes and resumed their regular activities, there has been a correlating increase in the need for and engagement in behavioral health services thus increasing the number of adults and children identified by professionals as SMI and SED.</p>
15	Arizona does not currently not collect this data. The state will review our process to initiate a change to capture this data in the future.

URS Table Number	General Notes
16A	<p>The variation in “total number of consumers receiving ACT Services” can be attributed to a few different factors. In 2022, data was reported to AHCCCS by the RBHA in Maricopa County with oversight of the ACT Teams, but the data they provided only included individuals who are assigned to the RBHA health plan; it did not include individuals who live with an SMI but elect to receive Medicaid benefits through a different managed care organization. In 2023, the state received the rosters directly from the ACT providers, which allowed AZ to see the totality of individuals receiving services, regardless of which Medicaid health plan they were insured by. The other variation between 2022 and 2023 is AHCCCS also included information for ACT Teams in Southern Arizona (a total of four additional teams) that were not included in previous submissions. In gathering information for 2023, the state also completed a look back on rosters between 2022 and 2023 to capture a de-duplicated list of individuals that received services on an ACT team for any period of time.</p> <p>AHCCCS requires Managed Care Organizations to develop Fidelity Monitoring programs for the Children's system of care. Additionally, in order to provide Therapeutic Foster Care, providers must receive training and licensure through the Department of Child Safety, which also includes ongoing annual fidelity monitoring of licensed providers.</p> <p>AHCCCS requires Managed Care Organizations to develop comprehensive monitoring programs for the Children's system of care. AHCCCS only permits billing of Multi-Systemic Therapy by providers who have complied with the training and implementation requirements, including ongoing adherence to treatment principles and program implementation review.</p> <p>AHCCCS requires Managed Care Organizations to develop Fidelity Monitoring programs for the Children's system of care but has not specifically implemented EBP or fidelity monitoring for Family Functional Therapy or the SAMSHA EBP tool kit. AHCCCS is in the process of developing a new fidelity monitoring policy and the implementation date and specific toolkits that will be required have yet to be determined.</p>
16B	<p>The increases in these populations can be accounted for overall increases we have seen in the number of children needing behavioral health services over the last several years and is consistent with the national trend data for this population.</p> <p>AHCCCS requires Managed Care Organizations to develop Monitoring programs for an integrated system of care but has not specifically implemented EBP or fidelity monitoring for Family Psychoeducation or the SAMSHA EBP tool kit. AHCCCS is in the process of developing a new fidelity monitoring policy and the implementation date and specific toolkits that will be required have yet to be determined.</p> <p>AHCCCS requires Managed Care Organizations to develop Monitoring programs for an integrated system of care but has not specifically implemented EBP or fidelity monitoring for Integrated Treatment for Co-occurring Disorders or the SAMSHA EBP tool kit. AHCCCS is in the process of developing a new fidelity monitoring policy and the implementation date and specific toolkits that will be required have yet to be determined.</p> <p>AHCCCS requires Managed Care Organizations to develop Monitoring programs for an integrated system of care but has not specifically implemented EBP or fidelity monitoring for Medication Management or the SAMSHA EBP tool kit. AHCCCS is in the process of developing a new fidelity monitoring policy and the implementation date and specific toolkits that will be required have yet to be determined.</p>
16C, 16D	<p>In the current system, there is not a way to identify First Episode Psychosis (FEP) via claims. AHCCCS has recently approved the use of the code H2041 for vetted FEP comprehensive treatment programs, which will provide a more reliable and efficient means of collecting this additional data.</p> <p>AHCCCS is currently updating AMPM Policy 320-T1 to clarify and provide additional guidance related to utilization of grant dollars in the treatment of Early Serious Mental Illness, including First Episode Psychosis. Included in these revisions are detailed sub-recipient reporting requirements that directly align with data reporting requirements found on the URS tables.</p> <p>AHCCCS additionally identified and remediated a barrier to delineating all procedure codes in our system related to MHBG covered services. As such, future reports will reflect improved accuracy of quantitative and qualitative data specific to MHBG targeted populations.</p>
20A, 20B, 21	<p>The Arizona State Hospital serves individuals who are under a court order for inpatient psychiatric treatment. The average length of stay for patients currently being served at the Forensic Hospital is approximately six (6) years. The average length of stay for current Civil Hospital patients is approximately four (4) years. Readmission to the Arizona State Hospital is infrequent and would require additional legal proceedings, either through the civil commitment process or criminal court order.</p>
