2023 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2023 URS Output Tables present findings from 58 states and U.S. territories. The U.S. Virgin Islands was omitted because they did not submit any data. Each output table provides summary information on the SMHA clients served in 2023: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2023, 8,253,780 clients received SMHA services from 58 states and U.S. territories/jurisdictions.This is an increase from 8,180,236 clients served by the SMHAs in 2022. There were 6,015,438 adults (or 23.0 per 1,000), 2,229,152 children (or 30.7 per 1,000) served. Age data was missing for 9,190 (0.1 percent) clients served.

- Among SMHA clients, there were 4,418,899 (53.5 percent) females served while there were 3,766,336 (45.6 percent) males served. In the majority of states (41), more females were served than males, and in the remaining states (17), more males were served than females.

- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 22.5 percent, children ages 13-17 with 12.7 percent, and children ages 6-12 with 11.8 percent.

- Over half of SMHA clients served were White, comprising the largest racial category at 56.8 percent; Black or African American clients comprised the next largest group with 17.3 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (68.5 percent), while 15.2 percent were Hispanic.

Missouri 2023 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 Population	8,253,780	10.92	24.50	58
Community Utilization per 1,000 Population	8,003,047	10.70	23.75	58
State Hospital Utilization per 1,000 Population	114,039	0.24	0.34	54

Notes:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 44

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2022-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.
The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.
The penetration rates for Transgender, Gender Non-Conforming, Other gender, Some Other Race, as well as Age, Gender, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 3 and from U.S. Census Bureau. All denominators for penetration rates use the SC-EST2022-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

The penetration rates for Transgender, Gender Non-Conforming, and Other gender, as well as Age Not Available and Gender Not Available are not reported on this table because the U.S. Census data does not include these categories.

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

Table 3 State Notes:

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition of SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring Mental and Substance Use Disorders, FY 2023

Missouri **Reporting Period:** 7/1/2022 To: 6/30/2023

Adults and Children Who Meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	95.7%	70.9%	77.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	87.8%	69.3%	74.0%	57

Co-Occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring M/SUD	53.0%	27.1%	24.5%	56
Percent of Children served through the SMHA who had a co-occurring M/SUD	8.0%	6.9%	2.5%	54
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	54.0%	26.8%	25.0%	54
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	9.0%	6.9%	2.5%	54

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

All consumers in mental health services who also had an SUD diagnosis (including tobacco smoking) or had an SUD episode of care in the reporting period

State Notes:

None

Ethnicity Not Available	-	-	16,519	7.8%	-	4.3%	43

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

State Notes:

None

Forensics included in "non forensic" data? No

Notes:

U.S. figures are based on states reporting. This table uses data from URS Tables 20A and 20B.

The ethnicity categories may not sum to the total number of readmissions and discharges because some states do not collect and report ethnicity separately from race.

State Notes:

In FY23, there was only one youth non-forensic patient readmitted within 180 days to a state hospital. Prior to being readmitted to the state hospital, this youth patient had 4 other hospital admissions and 1 ED visit over a period of 2 months.

General Notes, FY 2023

Missouri

URS Table Number	General Notes
2C, 2D	The Missouri Department of Mental Health will request changes to its information system to support the collection of data relating to sexual orientation. While we request the changes for FY2025 beginning in July of 2024, the requested changes will need to be prioritized along with other priority system changes.
4	The decreases in consumers employed and unemployed can be attributed to the overall decrease in adult community consumers included in the BCI file in FY 23 (42,943) compared to FY 22 (52,030). This being said, the percentage of consumers employed and unemployed has stayed pretty consistent over the two years for this cohort. For FY 23 consumers employed, the percentage is 6,070/42,943=14.14% and for FY 22 it is 7,360/52,030=14.15%. For FY 23 consumers unemployed, the percentage is 3,285/42,943=7.65% and for FY 22 it is 4,725/52,030=9.08%. As for the reason why the consumers included in BCI has decreased, MO has been excluding consumers that only received services funded by Medicaid Expansion in the FY.
5A	The total number of consumers with Non-Medicaid Funding only have decreased in FY23 as more consumers are receiving services through Medicaid Expansion. The total number of consumers with both Medicaid and Non-Medicaid Funding have also decreased in FY23 as more consumers are receiving services through Medicaid Expansion. MO has been excluding consumers that only received services funded by Medicaid Expansion in the FY, so as more consumers go to Medicaid Expansion the more consumers that we will be excluding
6	The total admissions to state hospitals for FY23 have increased due to the addition of 57 beds in one of the hospitals. More specifically, 32 beds which were initially closed during COVID have been re-opened and 25 new beds were added. The total number of consumers served in residential treatment centers at the beginning of the year have decreased for FY23 compared to FY22 due to a higher number of consumers who were discharged during the previous year. The total admissions to residential treatment centers for FY23 have increased due to the re-opening of 4 beds in youth residential treatment center and the re-opening of an adult residential treatment center. During the previous fiscal year, these beds were closed due to staffing concerns. The average length of stay among children discharged from state hospitals as well as the average length of stay among children (in facility <1 year) who were state hospital residents at the end of the year have decreased for FY23 compared to FY22. This decrease reflects the effort of the hospital staff in improving mental health symptoms as quickly as possible in order for the children to return to the community successfully. It should be noted that the average length of stay among children discharged from state hospitals has decreased by 17% from FY22 (160) to FY23 (132).

URS Table Number	General Notes
7A	MHBG Expenditures have increased because FY2023 MHBG expenditures included 3 different awards whereas FY2022 only included expenditures from 2 different awards. Other Funds Expenditures have increased because additional funding was available to spend in FY23. State Funds Expenditures have increased because there were additional state funds to spend in FY23. Mental Health Prevention Expenditures have decreased because there were less discretionary grant expenditures in FY23. EBP for ESMI Expenditures have increased because there was an increase in Medicaid expenditures for ESMI/FEP in FY23. State Hospital Expenditures have increased because there was additional funding available to spend in FY23. Grand Total Expenditure have increased because additional funding was available to spend in FY23. COVID-19 Relief Funds Expenditures have increased because spending was higher in FY23 to get all funds spent by the deadline. ARP Funds expenditures have increased because ARPA funds spending had a slow start in FY22 due to still spending the COVID-19 Relief funds. Crisis Services (5 percent set-aside) have increased because additional funding was available to spend for 988 Call Centers and mobile crisis teams in FY23.
7B	In FY23, MO began Missouri's Early Psychosis Care (EPC), which is a new best practice center dedicated to FEP care. EPC has spent this year assessing providers' FEP needs. In FY23, the provided trainings that best fit in this category.
8	MHBG Expenditures for Non-Direct Service Activities have increased because FY2023 included MHBG expenditures from 3 different awards whereas FY2022 only included expenditures from 2 different awards. COVID-19 funds Expenditures for Non-Direct Service Activities have decreased because all Non-Direct Service Funding was expended in FY22. ARP funds Expenditures for Non-Direct Services Activities have increased because FY22 included a slow start to ARPA funds spending due to still spending the COVID-19 Relief funds
15	Decreases in consumers in crisis residence, jail/correctional facilities, homeless/shelter, and other can be attributed to the overall decrease in consumers included in the BCI file in FY 23 (67,448) compared to FY 22 (75,307). MO has been excluding consumers that only received services funded by Medicaid Expansion in the FY.
16A	The total number of consumers receiving Supported Employment services is dependent on data collected by another state agency. Compared to FY22, the number of consumers receiving supported employment has decreased by 42% from FY22 (1,383) to FY23 (808). This decrease might have been affected by an increased provider staff turnover. Supported Housing services were never reported in prior years by Missouri Department of Mental Health (DMH) and per the table provided on 1/31/2024 this element was added, DMH does not have the ability to monitor fidelity for this service
16B	The total number of consumers receiving Integrated Dual Dx services has increased from FY22 to FY23 because DMH has included data from an additional source, which is the prospective payment system claims database that has all claims by CCBHO providers, for FY23 reporting. For FY22, data was extracted only from the fee-for-service claims database, so services provided by CCBHO providers were not included. Additionally, MO has improved our data extraction codes to ensure that all claims for this service were included for this fiscal year. Illness Self-Management services were never reported in prior years by Missouri Department of Mental Health (DMH) and DMH does not have the ability to monitor fidelity for this service.
17	The actual number of persons served through Call Centers and Mobile Crisis for the following age groups in Missouri: Age 0-12, Age 18-24, Age 65-84, Age 85+ and Age Not Available, have been included in the Age Not Available category. 2020 population data is used for the Crisis Stabilization Programs estimated percentage of population with access to service. MO plans to collect the data for Table 17 using the new age groups starting in FY 2025.
