2023 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2023 URS Output Tables present findings from 58 states and U.S. territories. The U.S. Virgin Islands was omitted because they did not submit any data. Each output table provides summary information on the SMHA clients served in 2023: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2023, 8,253,780 clients received SMHA services from 58 states and U.S. territories/jurisdictions. This is an increase from 8,180,236 clients served by the SMHAs in 2022. There were 6,015,438 adults (or 23.0 per 1,000), 2,229,152 children (or 30.7 per 1,000) served. Age data was missing for 9,190 (0.1 percent) clients served.

- Among SMHA clients, there were 4,418,899 (53.5 percent) females served while there were 3,766,336 (45.6 percent) males served. In the majority of states (41), more females were served than males, and in the remaining states (17), more males were served than females.

- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 22.5 percent, children ages 13-17 with 12.7 percent, and children ages 6-12 with 11.8 percent.

- Over half of SMHA clients served were White, comprising the largest racial category at 56.8 percent; Black or African American clients comprised the next largest group with 17.3 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (68.5 percent), while 15.2 percent were Hispanic.

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2022-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.
The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.
The penetration rates for Transgender, Gender Non-Conforming, Other gender, Some Other Race, as well as Age, Gender, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 17.

States are at different stages of crisis services implementation. In some states, mobile crisis teams are not available 24/7 or statewide and states may staff and operate crisis stabilization programs in different ways.

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

State Notes:

Multi Year Edits - Due to the small number in Residential Care any change appears to be more significant.

Notes:

U.S. figures are based on states reporting. This table uses data from URS Tables 20A and 20B.

The ethnicity categories may not sum to the total number of readmissions and discharges because some states do not collect and report ethnicity separately from race.

State Notes:

Total Number of discharges includes Non-Forensic Clients only but readmission not limited. Readmission included non- forensic and forensic too.

General Notes, FY 2023

Pennsylvania

URS Table Number	General Notes
3, 14C	PA continues to see a downward trend in the number of consumers served in Reidential Treatment Centers due to consumers receiving more appropriate levels of care.
4	Overall employment in PA has been increasing after impacts of the PHE begin to decrease.
5A	PA believes the increase in consumers with non-Medicaid funding only is due an increased normalization of behavioral health treatment as well as increased stressors due to the PHE.
7A	EBP for ESMI Expenditures: two FEP program added; COVID-19 Relief Funds Expenditures: funds were exhausted prior to this reporting period; ARP Funds Expenditures: PA started expending ARP funds this reporting period; Crisis Service : ARP Funds were used for crisis services.
10	PA is able to provide data for Set-Aside for FEP Programs; PA is unable to provide data for Adults with SMI, Children with SED, Set-Aside for ESMI Programs, and Set-Aside for Crisis Services.
15	Due to the small number in Residential Care any change appears to be more significant.
21	PA does not currently have plans to report this information.
